1. Executive Summary

Introduction and Methodology

- ^{1.1} The primary objective of this Gypsy and Traveller Accommodation Assessment (GTAA) is to provide a robust assessment of current and future need for Gypsy, Traveller and Travelling Showpeople accommodation in South Staffordshire Council (the Council).
- ^{1.2} The GTAA provides a credible evidence base which can be used to aid the implementation of Local Plan Policies and, where appropriate, the provision of new Gypsy and Traveller pitches and Travelling Showpeople plots for the period 2021 to 2038 to cover the South Staffordshire Local Plan Review period and the 15-year requirements set out in PPTS. The outcomes of this study supersede the outcomes of any previous GTAAs for South Staffordshire Council.
- ^{1.3} The GTAA has sought to understand the accommodation needs of the Gypsy, Traveller and Travelling Showpeople population in South Staffordshire through a combination of desk-based research, stakeholder interviews and engagement with members of the travelling community living on all known sites, yards, and encampments. A total of 115 interviews or proxy interviews were completed with Gypsies and Travellers living on sites in South Staffordshire and a total of 6 interviews were completed with Travelling Showpeople. Interviews were completed with 2 households living in bricks and mortar and 2 households living on the roadside, and a total of 11 stakeholder interviews were also completed.
- ^{1.4} The fieldwork for the study was completed in August 2021 and this is also the baseline date for the study.

Key Findings

Pitch Needs – Gypsies and Travellers

- ^{1.5} Overall the pitch needs for Gypsies and Travellers for the period 2021-2038 are set out below. Needs are set out for those households that met the planning definition of a Gypsy or Traveller; for any undetermined households¹ where an interview was not able to be completed due to households not being present despite up to three visits to each site who may meet the planning definition; and for those households that did not meet the planning definition – although this is no longer a requirement for a GTAA.
- ^{1.6} Only the need from those households who met the planning definition and from those of the undetermined households who subsequently demonstrate that they meet it should be formally considered as need arising from the GTAA. The need arising from households that met the planning definition should be addressed through site allocation/intensification/expansion Local Plan Policies as appropriate.

¹See Paragraph 3.28 for further information on undetermined households.

- ^{1.7} The Council will need to carefully consider how to address any need associated with undetermined Travellers as it is unlikely that all this need will have to be addressed through the provision of conditioned Gypsy or Traveller pitches. In terms of Local Plan Policies, the Council should consider the use of a criteria-based policy (as suggested in PPTS) for any undetermined households, as well as to deal with any windfall applications.
- ^{1.8} In general terms, the need for those households who did not meet the planning definition will need to be addressed as part of general housing need and through separate Local Plan Policies. This approach is specifically referenced in the revised National Planning Policy Framework (July 2021). Paragraph 61 of the NPPF sets out that in determining the minimum number of homes needed, strategic plans should be based upon a local housing need assessment conducted using the standard method in national planning guidance. Paragraph 62 then states that [emphasis added] 'Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, travellers, people who rent their homes and people wishing to commission or build their own homes'. The footnote to this section states that 'Planning Policy for Traveller Sites sets out how travellers' housing needs should be assessed for those covered by the definition in Annex 1 of that document.'
- ^{1.9} It is recognised that the Council already has in place an adopted Local Plan that sets out overall housing need. As this plan is reviewed the findings of this report should be considered as part of future housing mix and type within the context of the assessment of overall housing need in relation to Gypsies, Travellers and Travelling Showpeople. Whilst the findings in this report are aggregated totals for the whole of South Staffordshire due to data protection issues, the Council have more detailed data to enable accurate Local Plan allocation to be made.
- ^{1.10} There were 124 Gypsy or Traveller households identified in South Staffordshire that met the planning definition; 28 undetermined households that may meet the planning definition; and 32 households that did not meet the planning definition.
- ^{1.11} There is a need for **121 pitches for households that met the planning definition**. This is made up of 16 unauthorised pitches; 25 concealed or doubled-up households or single adults; 7 temporary pitches; 3 from in-migration/roadside; 21 teenagers in need of a pitch of their own in the next 5 years; and 49 from new household formation², derived from the household demographics.
- ^{1.12} There is a need for **9 pitches for undetermined households**. This is made up of 1 unauthorised pitch, and new household formation of 8 from a maximum of 28 households (using the ORS national formation rate of 1.50%³). If the ORS national average⁴ of 30% were applied this could result in a need for 3 pitches. If the locally derived proportion of households that met the planning definition (79%) were applied this could result in a need for 7 pitches.
- ^{1.13} Whilst not now a requirement to include in a GTAA, there is a need for **24 pitches for households** that did not meet the planning definition. This is made up of 8 concealed or doubled-up households or single adults; 2 movement from bricks and mortar; 5 teenagers in need of a pitch

² See Chapter 7 for further information on new household formation.

³ See Chapter 3 for further information on the ORS national formation rate.

⁴ Based on over 4,100 interviews completed by ORS across England.

of their own in the next 5 years; 2 temporary pitches; and 7 from new household formation, using a rate of 1.45% derived from the household demographics.

^{1.14} Figure 1 summarises the identified need and Figure 2 breaks this down by 5-year periods.

Plot Needs - Travelling Showpeople

- ^{1.15} Overall the plot needs for Travelling Showpeople from 2021-2038 are set out below. Needs are set out for those households that met the planning definition of a Travelling Showperson; for those undetermined households where an interview was not able to be completed who may meet the planning definition; and for those households that did not meet the planning definition (although this is no longer a requirement for a GTAA).
- ^{1.16} Only the need from those households who met the planning definition and from those of the undetermined households who may subsequently demonstrate that they meet it should be considered as need arising from the GTAA.
- ^{1.17} The need arising from households that met the planning definition should be addressed through yard allocation/intensification/expansion in Local Plan Policies.
- ^{1.18} The Council will need to carefully consider how to address any need associated with undetermined Travelling Showpeople as it is unlikely that all of this need will have to be addressed through the provision of conditioned Travelling Showpeople plots.
- ^{1.19} Any need for households who did not meet the planning definition will need to be considered as part of general housing need. See Paragraphs 1.10-1.13 for further details.
- ^{1.20} There is 1 Travelling Showperson's yard in South Staffordshire. All of the 6 households were interviewed, and all met the planning definition.
- ^{1.21} The GTAA identifies a need for **3 plots for households that met the planning definition**. This is made up of 3 from new household formation derived from the household demographics.

Transit Recommendations

- ^{1.22} Due to low historic low numbers of unauthorised encampments, and the existence of private transit pitches, it is not recommended that there is a need for a formal public transit site in South Staffordshire at this time.
- ^{1.23} The situation relating to levels of unauthorised encampments should be monitored whilst any potential changes associated with PPTS (2015) develop for example a potential increase in the number of households travelling to seek to meet the current planning definition.
- ^{1.24} As well as information on the size and duration of the encampments, this monitoring should also seek to gather information from residents on the reasons for their stay in the local area; whether they have a permanent base or where they have travelled from; whether they have any need or preference to settle permanently in the local area; and whether their travelling is a result of changes to PPTS (2015). This information could be collected as part of a Welfare Assessment (or similar).
- ^{1.25} It is recommended that a review of the evidence base relating to unauthorised encampments, including the monitoring referred to above, should be undertaken on a Staffordshire-wide basis. This will establish whether there is a need for investment in any new transit provision or emergency stopping places, or whether a managed approach is preferable.
- ^{1.26} In the short-term the Council should continue to use its current approach when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements could also be considered.
- ^{1.27} The term 'negotiated stopping' is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent 'built' transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the Council and the (temporary) residents regarding expectations on both sides. See www.leedsgate.co.uk for further information.
- ^{1.28} Temporary stopping places can be made available at times of increased demand due to fairs or cultural celebrations that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.

2. Introduction

- ^{2.1} The primary objective of this Gypsy and Traveller Accommodation Assessment (GTAA) is to provide a robust assessment of current and future need for Gypsy, Traveller and Travelling Showpeople accommodation in South Staffordshire. The outcomes of the study will supersede the outcomes of the previous Traveller and Travelling Showpeople Accommodation Needs Assessments completed in South Staffordshire.
- ^{2.2} The study provides an evidence base to enable the Council to comply with their requirements towards Gypsies, Travellers and Travelling Showpeople under the Housing Act 1985, Planning Policy for Traveller Sites (PPTS) 2015, the Housing and Planning Act (2016), the revised National Planning Policy Framework (NPPF) 2021, and the revised Planning Practice Guidance (PPG) 2021.
- ^{2.3} The GTAA provides a robust assessment of need for Gypsy, Traveller and Travelling Showpeople accommodation in the study area. It is a credible evidence base which can be used to aid the implementation of Local Plan Policies and the provision of Traveller pitches and plots covering the period 2021 to 2038 to meet the Local Plan Review period and the 15-year requirements of the PPTS. As well as identifying current and future permanent accommodation needs, it also seeks to identify any need for the provision of transit sites or emergency stopping places.
- ^{2.4} We would note at the outset that the study covers the needs of Gypsies (including English, Scottish, Welsh and Romany Gypsies), Irish Travellers, New (Age) Travellers, and Travelling Showpeople, but for ease of reference we have referred to the study as a Gypsy and Traveller (and Travelling Showpeople) Accommodation Assessment (GTAA).
- ^{2.5} The baseline date for the study is August 2021 which was when the household interviews were completed.

Definitions

^{2.6} The planning definition for a Gypsy, Traveller or Travelling Showperson is set out in PPTS (2015). The previous definition set out in the Housing Act (2004) was repealed by the Housing and Planning Act (2016).

The Planning Definition in PPTS (2015)

^{2.7} For the purposes of the planning system, the definition was changed in PPTS (2015). The planning definition is set out in Annex 1 and states that:

For the purposes of this planning policy "gypsies and travellers" means:

Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family's or dependants' educational or health needs or old age have ceased to travel temporarily, but excluding members of an organised group of travelling showpeople or circus people travelling together as such.

In determining whether persons are "gypsies and travellers" for the purposes of this planning policy, consideration should be given to the following issues amongst other relevant matters:

a) Whether they previously led a nomadic habit of life.

b) The reasons for ceasing their nomadic habit of life.

c) Whether there is an intention of living a nomadic habit of life in the future, and if so, how soon and in what circumstances.

For the purposes of this planning policy, "travelling showpeople" means:

Members of a group organised for the purposes of holding fairs, circuses or shows (whether or not travelling together as such). This includes such persons who on the grounds of their own or their family's or dependants' more localised pattern of trading, educational or health needs or old age have ceased to travel temporarily, but excludes Gypsies and Travellers as defined above.

(Planning Policy for Traveller Sites, Department for Communities and Local Government (DCLG), August 2015)

^{2.8} The key change that was made to both definitions was the removal of the term "*persons…who* have ceased to travel permanently", meaning that those who have ceased to travel permanently will no longer fall under the planning definition of a Traveller for the purposes of assessing accommodation need in a GTAA.

Definition of Travelling

- ^{2.9} One of the most important questions that GTAAs will need to address in terms of applying the planning definition is *what constitutes travelling*? This has been determined through case law that has tested the meaning of the term '*nomadic*'.
- ^{2.10} R v South Hams District Council (1994) defined Gypsies as "persons who wander or travel for the purpose of making or seeking their livelihood (not persons who travel from place to place without any connection between their movements and their means of livelihood.)" This includes 'born' Gypsies and Travellers as well as 'elective' Travellers such as New Age Travellers.
- ^{2.11} In **Maidstone BC v Secretary of State for the Environment and Dunn (2006)**, it was held that a Romany Gypsy who bred horses and travelled to horse fairs at Appleby, Stow-in-the-Wold and the New Forest, where he bought and sold horses, and who remained away from his permanent site for up to two months of the year, at least partly in connection with this traditional Gypsy activity, was entitled to be accorded Gypsy status.
- ^{2.12} In **Greenwich LBC v Powell (1989)**, Lord Bridge of Harwich stated that a person could be a statutory Gypsy if he led a nomadic way of life *only seasonally*.
- ^{2.13} The definition was widened further by the decision in **R v Shropshire CC ex p Bungay (1990)**. The case concerned a Gypsy family that had not travelled for some 15 years in order to care for its elderly and infirm parents. An aggrieved resident living in the area of the family's recently approved Gypsy site sought judicial review of the local authority's decision to accept that the family had retained their Gypsy status even though they had not travelled for some considerable time. Dismissing the claim, the judge held that a person could remain a Gypsy even if he or she did not travel, provided that their nomadism was held in abeyance and not abandoned.
- ^{2.14} That point was revisited in the case of **Hearne v National Assembly for Wales (1999)**, where a traditional Gypsy was held not to be a Gypsy for the purposes of planning law as he had stated

that he intended to abandon his nomadic habit of life, lived in a permanent dwelling, and was taking a course that led to permanent employment.

- ^{2.15} Wrexham County Borough Council v National Assembly of Wales and Others (2003) determined that households and individuals could continue to lead a nomadic way of life with a permanent base from which they set out from and return to.
- ^{2.16} The implication of these rulings in terms of applying the planning definition is that it will **only include those who travel (or have ceased to travel temporarily) for work purposes, or for seeking work, and in doing so stay away from their usual place of residence**. It can include those who have a permanent site or place of residence, but that it will not include those who travel for purposes other than work such as holidays and visiting friends or relatives. It will not cover those who commute to work daily from a permanent place of residence (see APP/E2205/C/15/3137477).
- ^{2.17} It may also be that within a household some family members travel for nomadic purposes on a regular basis, but other family members stay at home to look after children in education, or other dependents with health problems etc. In these circumstances the household unit would be defined as travelling under the planning definition.
- ^{2.18} Households will also fall under the planning definition if they can demonstrate that they have ceased to travel temporarily as a result of their own or their family's or dependants' educational, health needs or old age. In order to have ceased to travel temporarily these households will need to demonstrate that they have travelled for work in the past. In addition, households will also have to demonstrate that they plan to travel again for work in the future.
- ^{2.19} This approach was endorsed by a Planning Inspector in Decision Notice for an appeal in East Hertfordshire (Appeal Ref: APP/J1915/W/16/3145267) that was issued in December 2016. A summary can be seen below.

Case law, including the R v South Hams District Council ex parte Gibb (1994) judgment referred to me at the hearing, despite its reference to 'purposive activities including work' also refers to a connection between the travelling and the means of livelihood, that is, an economic purpose. In this regard, there is no economic purpose... This situation is no different from that of many landlords and property investors or indeed anyone travelling to work in a fixed, pre-arranged location. In this regard there is not an essential connection between wandering and work... Whilst there does appear to be some connection between the travel and the work in this regard, it seems to me that these periods of travel for economic purposes are very short, amounting to an extremely small proportion of his time and income. Furthermore, the work is not carried out in a nomadic manner because it seems likely that it is done by appointment... I conclude, therefore, that XX does not meet the definition of a gypsy and traveller in terms of planning policy because there is insufficient evidence that he is currently a person of a nomadic habit of life. ^{2.20} This was further reinforced in a more recent Decision Notice for an appeal in Norfolk that was issued in February 2018 (Ref: APP/V2635/W/17/3180533) that stated:

As discussed during the hearing, although the PPTS does not spell this [the planning definition] out, it has been established in case law (R v South Hams DC 1994) that the nomadism must have an economic purpose. In other words, gypsies and travellers wander of travel for the purposes of making or seeking their livelihood.

Legislation and Guidance for Gypsies and Travellers

- ^{2.21} Decision-making for policy concerning Gypsies, Travellers and Travelling Showpeople sits within a complex legislative and national policy framework and this study must be viewed in the context of this legislation and guidance. For example, the following key pieces of legislation and guidance are relevant when developing policies relating to Gypsies, Travellers and Travelling Showpeople:
 - » The Housing Act, 1985
 - » Planning Policy for Traveller Sites (PPTS), 2015
 - » The Housing and Planning Act, 2016
 - » National Planning Policy Framework (NPPF), 2021
 - » Planning Practice Guidance⁵ (PPG), 2021
- ^{2.22} In addition, Case Law, Ministerial Statements, the outcomes of Local Plan Examinations and Planning Appeals, and Judicial Reviews need to be taken into consideration. Relevant examples have been included in this report.
- ^{2.23} The primary guidance for undertaking the assessment of housing need for Gypsies, Travellers and Travelling Showpeople is set out in the PPTS (2015). It should be read in conjunction with the National Planning Policy Framework (NPPF). In addition, the Housing and Planning Act makes provisions for the assessment of need for those Gypsy, Traveller and Travelling Showpeople households living on sites and yards who do not meet the planning definition through the assessment of all households living in caravans.

Planning Policy for Traveller Sites (PPTS) 2015

- ^{2.24} PPTS (2015), sets out the direction of Government policy. As well as introducing the planning definition of a Traveller, PPTS is closely linked to the NPPF. Among other objectives, the aims of the policy in respect of Traveller sites are (PPTS Paragraph 4):
 - » Local planning authorities should make their own assessment of need for the purposes of planning.
 - » To ensure that local planning authorities, working collaboratively, develop fair and effective strategies to meet need through the identification of land for sites.
 - » To encourage local planning authorities to plan for sites over a reasonable timescale.
 - » That plan-making and decision-taking should protect Green Belt from inappropriate development.

⁵ With particular reference to the sections on *Housing needs of different groups* (May 2021).

- » To promote more private Traveller site provision while recognising that there will always be those Travellers who cannot provide their own sites.
- » That plan-making and decision-taking should aim to reduce the number of unauthorised developments and encampments and make enforcement more effective.
- » For local planning authorities to ensure that their Local Plan includes fair, realistic and inclusive policies.
- » To increase the number of Traveller sites in appropriate locations with planning permission, to address under provision and maintain an appropriate level of supply.
- » To reduce tensions between settled and Traveller communities in plan-making and planning decisions.
- » To enable provision of suitable accommodation from which Travellers can access education, health, welfare, and employment infrastructure.
- » For local planning authorities to have due regard to the protection of local amenity and local environment.
- ^{2.25} In practice, the document states that (PPTS Paragraph 9):
 - » Local planning authorities should set pitch targets for Gypsies and Travellers and plot targets for Travelling Showpeople, which address the likely permanent and transit site accommodation needs of Travellers in their area, working collaboratively with neighbouring local planning authorities.
- ^{2.26} PPTS goes on to state (Paragraph 10) that in producing their Local Plan local planning authorities should:
 - » Identify and annually update a supply of specific deliverable sites sufficient to provide five years' worth of sites against their locally set targets.
 - » Identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15.
 - » Consider production of joint development plans that set targets on a cross-authority basis, to provide more flexibility in identifying sites, particularly if a local planning authority has special or strict planning constraints across its area (local planning authorities have a Dutyto-Cooperate on strategic planning issues that cross administrative boundaries).
 - » Relate the number of pitches or plots to the circumstances of the specific size and location of the site and the surrounding population's size and density.
 - » Protect local amenity and environment.
- ^{2.27} Local Authorities now have a duty to ensure a 5-year land supply to meet the identified needs for Traveller sites. However, PPTS 2015 also notes in Paragraph 11 that:
 - Where there is no identified need, criteria-based policies should be included to provide a basis for decisions in case applications nevertheless come forward. Criteria-based policies should be fair and should facilitate the traditional and nomadic life of Travellers, while respecting the interests of the settled community.

Revised National Planning Policy Framework (2021)

- ^{2.28} The most recent version of the revised National Planning Policy Framework was issued in July 2021. Paragraph 61 of the revised NPPF sets out that in determining the minimum number of homes needed, strategic plans should be based upon a local housing need assessment conducted using the standard method in national planning guidance.
- ^{2.29} Paragraph 62 then states that [emphasis added] 'Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, <u>travellers</u>, people who rent their homes and people wishing to commission or build their own homes'. The footnote to this section states that 'Planning Policy for Traveller Sites sets out how travellers' housing needs should be assessed for those covered by the definition in Annex 1 of that document.'
- ^{2.30} This essentially sets out that the needs of households that meet the planning definition should be assessed under the PPTS and that the needs of households that are not found to meet the planning definition should be assessed as part of the wider housing needs of an area.
- ^{2.31} In an Appeal Decision that was published in March 2020 for an appeal in Central Bedfordshire (APP/P0240/C/18/3213822) the Inspector concluded in relation to Paragraph 61 of the revised NPPF that:

It seems to me that this wording makes clear that it is only those meeting that definition that should be included in an assessment of need for 'planning definition' travellers and that gypsies who have ceased travelling should be counted and provided for elsewhere and this is the approach proposed in the emerging LP. This does not, of course mean that these gypsies should be allocated 'bricks and mortar' type housing. They will also need a suitable supply of caravan sites to meet their needs.

Planning for the Future White Paper (2020)

^{2.32} In August 2020 the Government published a White Paper on proposals to reform the current planning system in England. The consultation period on the White Paper ended on 29th October 2020. Whilst the White Paper does not make any references to planning for Gypsies and Travellers, the Council may need to consider the outcomes of the consultation and any subsequent changes to planning legislation in England that relate to Gypsies and Travellers.

3. Methodology

Background

- ^{3.1} Over the past 10 years, ORS has continually refined a methodology for undertaking robust and defensible Gypsy, Traveller and Travelling Showpeople Accommodation Needs Assessments. This has been updated in light of changes to PPTS in August 2015, the Housing and Planning Act (2016) the revised NPPF (2021), and the revised PPG (2021). It has also responded to changes set out by Planning Ministers, with particular reference to new household formation rates. This is an evolving methodology that has been adaptive to changes in planning policy as well as the outcomes of Local Plan Examinations and Planning Appeals.
- ^{3.2} PPTS (2015) contains a number of requirements for local authorities which must be addressed in any methodology. This includes the need to pay particular attention to early and effective community engagement with both settled and traveller communities (including discussing travellers' accommodation needs with travellers themselves); identification of permanent and transit site accommodation needs separately; working collaboratively with neighbouring local planning authorities; and establishing whether households fall within the planning definition for Gypsies, Travellers and Travelling Showpeople.
- ^{3.3} ORS would note that since the changes to the PPTS in August 2015 the ORS GTAA methodology has been repeatedly found to be sound and robust, including through Local Plan Examinations in Bedford, Cambridge, Central Bedfordshire, Cheltenham, Cotswold, Daventry, East Hertfordshire, Gloucester, Maldon, Milton Keynes, Newham, Runnymede, South Cambridgeshire, South Northamptonshire, Tewkesbury, and Waverley.
- ^{3.4} A recent Appeal Decision for a Hearing in Central Bedfordshire (APP/P0240/C/18/3213822) that was issued in March 2020 concluded:

'...whilst there have been some queries in previous appeal decisions over the conclusions of other GTAAs produced by ORS, the methodology, which takes into account the revisions made in 2015 to the Government's Planning Policy for Traveller Sites (PPTS), has nevertheless been accepted by Inspectors in a considerable number of Local Plan Examinations.'

^{3.5} The Inspector for the East Herts District Plan also found the evidence base in relation to Gypsies and Travellers to be sound in her Inspection Report that was issued in July 2018. She concluded:

'The need of the travelling community has been carefully and robustly assessed and locations to meet identified needs have been allocated for the plan period. Policy HOU9 sets out the need for 5 permanent pitches for Gypsies and Travellers... the approach to the provision of housing is comprehensive, positively prepared, appropriate to the needs of the area and consistent with national policy.'

^{3.6} The stages below provide a summary of the methodology that was used to complete this study. More information on each stage is provided in the appropriate sections of this report.

Glossary of Terms/Acronyms

^{3.7} A Glossary of Terms/Acronyms can be found in **Appendix A**.

Desk-Based Review

- ^{3.8} ORS collated a range of secondary data that was used to support the study. This included:
 - » Census data.
 - » Traveller Caravan Count data.
 - » Records of unauthorised sites/encampments.
 - » Information on planning applications/appeals.
 - » Information on enforcement actions.
 - » Existing Needs Assessments and other relevant local studies.
 - » Existing national and local policy, guidance, and best practice.

Stakeholder Engagement

^{3.9} Engagement was undertaken with key Council Officers from South Staffordshire through telephone interviews. A total of 3 interviews were completed with Council Officers from the study area and an interview was also completed with an Officer from Staffordshire County Council.

Working Collaboratively with Neighbouring Planning Authorities

- ^{3.10} To help support the Duty-to-Cooperate and provide background information for the study, telephone interviews were conducted with Planning Officers in neighbouring planning authorities. These interviews will help to ensure that wider issues that may impact on this project are fully understood. This included interviews with Officers from the Councils set out below. Again, a detailed topic guide was agreed with the Council.
 - » Bromsgrove
 - » Cannock Chase
 - » Dudley
 - » Shropshire
 - » Stafford
 - » Walsall
 - » Wolverhampton

Survey of Travelling Communities

^{3.11} Through the desk-based research and the stakeholder interviews, ORS sought to identify all authorised and unauthorised sites/yards and encampments in the study area and attempted to complete an interview with the residents on all occupied pitches and plots. In order to gather the robust information needed to assess households against the planning definition of a Traveller, up

to 3 visits were made to households where it was not initially possible to conduct an interview because they were not available at the time.

- ^{3.12} Our experience suggests that an attempt to interview households on all pitches is more robust. A sample-based approach often leads to an under-estimate of need – and is an approach which is regularly challenged by the Planning Inspectorate and at Planning Appeals.
- ^{3.13} ORS worked closely with the Council to ensure that the interviews collected all the necessary information to support the study. The site interview questions that were used (see **Appendix E**) have been updated to take account of recent changes to PPTS and to collect the information ORS feel is necessary to apply the planning definition. All sites and yards were visited by members of our dedicated team of experienced Researchers who work on our GTAA studies across England and Wales. Researchers attempted to conduct semi-structured interviews with residents to determine their current demographic characteristics, their current or future accommodation needs, whether there is any over-crowding or the presence of concealed households and travelling characteristics. Researchers also sought to identify contacts living in bricks and mortar to interview, as well as an overall assessment of each site to determine any opportunities for intensification or expansion to meet future needs.
- ^{3.14} Researchers also sought information from residents on the type of pitches they may require in the future – for example private or socially rented, together with any features they may wish to be provided on a new pitch or site.
- ^{3.15} Where it was not possible to undertake an interview, Researchers sought to capture as much information as possible about each pitch through a proxy interview from sources including neighbouring residents and site management (if present).
- ^{3.16} Researchers also distributed copies of an information leaflet that was prepared by Friends, Families and Travellers explaining the reasons for the need to complete the household interview as part of the GTAA process.

Figure 5 – Friends, Families and Traveller Leaflet

Engagement with Bricks and Mortar Households

- ^{3.17} The 2011 Census recorded just 13 households that were identified as either Gypsies or Irish Travellers who lived in a house in South Staffordshire and just 3 who lived in a flat or maisonette.
- ^{3.18} ORS apply a rigorous approach to making contact with bricks and mortar households as this is a common issue raised at Local Plan Examinations and Planning Appeals. Contacts were sought through a range of sources including the interviews with people on existing sites and yards; intelligence from the stakeholder interviews; information from housing registers; and other local knowledge from stakeholders. Through this approach the GTAA endeavoured to do everything to give households living in bricks and mortar the opportunity to make their views known.
- ^{3.19} As a rule, ORS do not make any assumptions on the overall needs from household in bricks and mortar based on the outcomes of any interviews that are completed, as in our experience this leads to a significant over-estimate of the number of households wishing to move to a site or a yard. ORS work on the assumption that all those wishing to move will make their views known to us based on the wide range of publicity put in place.

Timing of the Fieldwork

^{3.20} ORS are fully aware of the transient nature of many travelling communities and subsequent seasonal variations in site and yard occupancy. ORS would normally aim to complete fieldwork during the non-travelling season, and also avoid days of known local or national events. The initial fieldwork was completed over an extended period between November 2019 and March 2020 and Researchers were able to collect information on the majority of residents. In addition further household interviews were completed between June and August 2021 during the completion of a Pitch Deliverability Study.

Applying the Planning Definition

- ^{3.21} The primary change to PPTS (2015) in relation to the assessment of need was the change to the definition of a Gypsy, Traveller or Travelling Showperson for planning purposes. Through the site interviews ORS sought to collect information necessary to assess each household against the planning definition. As the revised PPTS was only issued in 2015, only a small number of relevant appeal decisions have been issued by the Planning Inspectorate on how the planning definition should be applied (see Paragraphs 2.20 and 2.21 for examples) these support the view that households need to be able to demonstrate that they travel for work purposes, or for seeking work, to meet the planning definition, and stay away from their usual place of residence when doing so, or have ceased to travel for work purposes temporarily due to education, ill health or old age.
- ^{3.22} The household survey included a structured section of questions to record information about the travelling characteristics of household members. This included questions on the following key issues:
 - » Whether any household members have travelled in the past 12 months.
 - » Whether household members have ever travelled.
 - » The main reasons for travelling.

- » Where household members travelled to.
- » The times of the year that household members travelled.
- » Where household members stay when they are away travelling.
- » When household members stopped travelling.
- » The reasons why household members stopped travelling.
- » Whether household members intend to travel again in the future.
- » When and the reasons why household members plan to travel again in the future.
- ^{3.23} When the household survey was completed, the answers from these questions on travelling were used to determine the status of each household against the planning definition in PPTS (2015). Through a combination of responses, households need to provide sufficient information to demonstrate that household members travel for work purposes, or for seeking work, and in doing so stay away from their usual place of residence, or that they have ceased to travel temporarily due to education, ill health or old age, and plan to travel again for work purposes in the future. The same definition applies to Travelling Showpeople as to Gypsies and Travellers.
- ^{3.24} Households that need to be considered in the GTAA fall under one of three classifications that will determine whether their housing needs will need to be assessed in the GTAA. Only those households that meet, or may meet, the planning definition will form the components of need to be formally included in the GTAA:
 - » Households that travel under the planning definition.
 - » Households that have ceased to travel temporarily under the planning definition.
 - » Households where an interview was not possible who may fall under the planning definition.
- ^{3.25} Whilst the needs of those households that do not meet the planning definition do not need to be included in the GTAA, they will be assessed to provide the Council with components of need to consider as part of their work on wider housing needs assessments. This is consistent with the requirements of the revised NPPF (2021).

Undetermined Households

- ^{3.26} As well as calculating need for households that meet the planning definition, the needs of the households where an interview was not completed (either due to refusal to be interviewed or households that were not present during the fieldwork period) need to be assessed as part of the GTAA where they are believed to be Gypsies and Travellers who may meet the planning definition. Whilst there is no law or guidance that sets out how the needs of these households should be addressed; an approach has been taken that seeks an estimate of potential need from these households. This will be an additional need figure over and above the need identified for households that do meet the planning definition.
- ^{3.27} The estimate seeks to identify potential current and future need from any pitches known to be temporary or unauthorised, and through new household formation. For the latter the ORS national rate of 1.50% has been used as the demographics of residents are unknown.

- ^{3.28} Should further information be made available to the Council that will allow for the planning definition to be applied, these households could either form a confirmed component of need to be addressed through the GTAA or through wider assessments of housing need.
- ^{3.29} ORS believe it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether households where an interview was not completed meet the planning definition based on the outcomes of households where an interview was completed.
- ^{3.30} However, data that has been collected from over 5,000 household interviews that have been completed by ORS since the changes to PPTS in 2015 suggests that overall approximately 30% of households who have been interviewed meet the planning definition (this rises to 70% for Travelling Showpeople based on over 400 interviews that have been completed) and in some local authorities, no households meet the planning definition.
- ^{3.31} ORS are not implying that this is an official national statistic rather a national statistic based on the outcomes of our fieldwork since the introduction of PPTS (2015). It is estimated that there are 14,000 Gypsy and Traveller pitches in England and ORS have spoken with households on approximately 30% of them at a representative range of sites. Approximately 30% meet the planning definition. It is ORS' view therefore that this is the most comprehensive national statistic in relation to households that meet the planning definition in PPTS (2015) and should be seen as a robust statistical figure.
- ^{3.32} This would also suggest that it is likely that only a proportion of the potential need identified from undetermined households will need conditioned Gypsy and Traveller pitches, and that the needs of the majority will need to be addressed through separate Local Plan Policies.
- ^{3.33} The ORS methodology to address the need arising from undetermined households was supported by the Planning Inspector for a Local Plan Examination for Maldon District Council, Essex. In his Report that was published on 29th June 2017 he concluded:
- 150. The Council's stance is that any need arising from 'unknowns' should be a matter left to the planning application process. Modifications to Policy H6 have been put forward by the Council setting out criteria for such a purpose, which I consider further below. To my mind, that is an appropriate approach. While there remains a possibility that up to 10 further pitches may be needed, that cannot be said to represent identified need. It would be unreasonable to demand that the Plan provide for needs that have not been established to exist. That being said, MM242h is nonetheless necessary in this regard. It commits the Council to a review of the Plan if future reviews of the GTAA reveal the necessity for land allocations to provide for presently 'unknown' needs. For effectiveness, I have altered this modification from the version put forward by the Council by replacing the word "may" with "will" in relation to undertaking the review committed to. I have also replaced "the Plan" with "Policy H6" the whole Plan need not be reviewed.

Households that Do Not Meet the Planning Definition

^{3.34} Households who do not travel for work now fall outside the planning definition of a Traveller. However Romany Gypsies, Irish and Scottish Travellers may be able to claim a right to culturally appropriate accommodation under the Equality Act (2010) as a result of their protected characteristics. In addition, provisions set out in the Housing and Planning Act (2016) now include a duty (under Section 8 of the 1985 Housing Act that covers the requirement for a periodical review of housing needs) for local authorities to consider the needs of people residing in or resorting to their district with respect to the provision of sites on which caravans can be stationed, or places on inland waterways where houseboats can be moored. Draft Guidance⁶ related to this section of the Act has been published setting out how the government would want local housing authorities to undertake this assessment and it is the same as the GTAA assessment process. The implication is therefore that the housing needs of any Gypsy and Traveller households who do not meet the planning definition of a Traveller will need to be assessed as part of the wider housing needs of the area and will form a subset of the wider need arising from households residing in caravans. This is echoed in the revised NPPF (February 2019).

^{3.35} Paragraph 62 of the revised NPPF states that [emphasis added] 'Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, **travellers**, people who rent their homes and people wishing to commission or build their own homes'. The footnote to this section states that 'Planning Policy for Traveller Sites sets out how travellers' housing needs should be assessed for those covered by the definition in Annex 1 of that document.'

Calculating Current and Future Need

^{3.36} To identify need, PPTS (2015) requires an assessment for current and future pitch requirements but does not provide a methodology for this. However, as with any housing assessment, the underlying calculation can be broken down into a relatively small number of factors. In this case, the key issue is to compare the supply of pitches available for occupation with the current and future needs of the population.

Supply of Pitches

- ^{3.37} The first stage of the assessment sought to determine the number of occupied, vacant, and potentially available supply in the study area:
 - » Current vacant pitches.
 - » Pitches currently with planning consent due to be developed within 5 years.
 - » Pitches vacated by people moving to housing.
 - » Pitches vacated by people moving from the study area (out-migration).
- ^{3.38} It is important when seeking to identify supply from vacant pitches that they are in fact available for general occupation – i.e. on a public or social rented site, or on a private site that is run on a commercial basis with anyone being able to rent a pitch if they are available. Typically, vacant pitches on small private family sites are not included as components of available supply but can be used to meet any current and future need from the family living on the site.

⁶ Draft guidance to local housing authorities on the periodical review of housing needs for caravans and houseboats. DCLG (March 2016).

Current Need

- ^{3.39} The second stage was to identify components of current need, which is not necessarily the need for pitches because they may be able to be addressed by space already available in the study area. It is important to address issues of double counting:
 - » Households on unauthorised developments for which planning permission is not expected.
 - » Concealed, doubled-up or over-crowded households (including single adults).
 - » Households in bricks and mortar wishing to move to sites.
 - » Households in need on waiting lists for public sites.

Future Need

- ^{3.40} The final stage was to identify components of future need. This includes the following four components:
 - » Teenage children in need of a pitch of their own in the next 5 years.
 - » Households living on sites with temporary planning permissions.
 - » New household formation.
 - » In-migration/roadside.
- ^{3.41} Household formation rates are often the subject of challenge at appeals or examinations. ORS firmly believe that any household formation rates should use a robust local evidence base, rather than simply relying on national precedent. The approach taken is set out in more detail in Chapter 7 of this report.
- ^{3.42} ORS are also increasingly identifying households and adult household members who have been forced to leave sites due to over-crowding or exceeding planning conditions on the number of caravans permitted on sites. These households are typically living on the roadside or doubling-up on pitches in neighbouring local authorities. ORS include these households as components of hidden need and term them displaced in-migration.
- ^{3.43} All of these components of supply and need are presented in tabular format which identify the overall net need for current and future accommodation for Gypsies, Travellers and Travelling Showpeople. This has proven to be a robust model for identifying needs. The residential and transit pitch needs for Gypsies and Travellers and Travelling Showpeople are identified separately and the needs are to 2038.

Pitch Turnover

^{3.44} Some assessments of need make use of pitch turnover as an ongoing component of supply. ORS do not agree with this approach or about making any assumptions about annual turnover rates. This approach frequently ends up significantly under-estimating need as, in the majority of cases, vacant pitches on sites are not available to meet any local need. The use of pitch turnover has been the subject of a number of Inspectors Decisions, for example APP/J3720/A/13/2208767 found a GTAA to be unsound when using pitch turnover and concluded:

West Oxfordshire Council relies on a GTAA published in 2013. This identifies an immediate need for 6 additional pitches. However, the GTAA methodology treats pitch turnover as a component of supply. This is only the case if there is net outward migration, yet no such scenario is apparent in West Oxfordshire. Based on the evidence before me I consider the underlying criticism of the GTAA to be justified and that unmet need is likely to be higher than that in the findings in the GTAA.

^{3.45} In addition, a recent GTAA Best Practice Guide produced jointly by organisations including Friends, Families and Travellers, the London Gypsy and Traveller Unit, the York Travellers Trust, the Derbyshire Gypsy Liaison Group, Garden Court Chambers and Leeds GATE concluded that:

Assessments involving any form of pitch turnover in their supply relies upon making assumptions; a practice best avoided. Turnover is naturally very difficult to assess accurately and in practice does not contribute meaningfully to additional supply so should be very carefully assessed in line with local trends. Mainstream housing assessments are not based on the assumption that turnover within the existing stock can provide for general housing needs.

^{3.46} As such, other than current vacant pitches on sites that are known to be available, or pitches that are known to become available through the household interviews, pitch turnover has not been considered as a component of supply in this GTAA.

Transit Provision

- ^{3.47} GTAA studies require the identification of demand for transit provision. While the majority of Gypsies and Travellers have permanent bases either on Gypsy and Traveller sites or in bricks and mortar and no longer travel, other members of the community either travel permanently or for part of the year. Due to the mobile nature of the population a range of sites can be developed to accommodate Gypsies and Travellers as they move through different areas.
 - » Transit sites full facilities where Gypsies and Travellers might live temporarily (for up to three months) – for example, to work locally, for holidays or to visit family and friends.
 - » Emergency stopping places more limited facilities.
 - » Temporary sites and stopping places only temporary facilities to cater for an event.
 - » Negotiated stopping places agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time.
- ^{3.48} Transit sites serve a specific function of meeting the needs of Gypsy and Traveller households who are visiting an area or who are passing through on the way to somewhere else. A transit site typically has a restriction on the length of stay of usually around 12 weeks and has a range of facilities such as water supply, electricity, and amenity blocks.
- ^{3.49} An alternative to or in addition to a transit site is an emergency stopping place. This type of site also has restrictions on the length of time for which someone can stay on it but has much more limited facilities with typically only a source of water and chemical toilets provided.

- ^{3.50} Another alternative is 'negotiated stopping'. The term 'negotiated stopping' is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent 'built' transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the authority and the (temporary) residents regarding expectations on both sides.
- ^{3.51} Temporary stopping places can be made available at times of increased demand due to fairs or cultural celebrations that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.
- ^{3.52} The Criminal Justice and Public Order Act 1994 (Section 62a) is particularly important with regard to the issue of Gypsy and Traveller transit site provision. Section 62a of the Act allows the police to direct trespassers to remove themselves and their vehicles and property from any land where a suitable transit pitch on a relevant caravan site is available within the same local authority area (or within the county in two-tier local authority areas).
- ^{3.53} In order to investigate the potential need for transit provision when undertaking work to support the study, ORS sought to undertake analysis of any records of unauthorised sites and encampments, as well as information from the Ministry of Housing Communities and Local Government (MHCLG)⁷ Traveller Caravan Count. The outcomes of discussions with Council Officers and with Officers from neighbouring planning authorities were also taken into consideration when determining this element of need in the study area.

⁷ Formerly the Department for Communities and Local Government (DCLG).

Gypsy, Traveller & Travelling Showpeople Sites & Population

Introduction

- ^{4.1} One of the main considerations of this study is to provide evidence to support the provision of pitches and plots to meet the current and future accommodation needs of Gypsies, Travellers and Travelling Showpeople. A pitch is an area normally occupied by one household, which typically contains enough space for one or two caravans but can vary in size⁸. A site is a collection of pitches which form a development exclusively for Gypsies and Travellers. For Travelling Showpeople, the most common descriptions used are a plot for the space occupied by one household and a yard for a collection of plots which are typically exclusively occupied by Travelling Showpeople. Throughout this study the main focus is upon how many extra pitches for Gypsies and Travellers and plots for Travelling Showpeople are required in the study area.
- ^{4.2} The public and private provision of mainstream housing is also largely mirrored when considering Gypsy and Traveller accommodation. One common form of a Gypsy and Traveller site is the publicly provided residential site, which is provided by a Local Authority or by a Registered Provider (usually a Housing Association). Pitches on public sites can be obtained through signing up to a waiting list, and the costs of running the sites are met from the rent paid by the tenants (similar to social housing).
- ^{4.3} The alternative to a public residential site is a private residential site and yard for Gypsies, Travellers and Travelling Showpeople. These result from individuals or families buying areas of land and then obtaining planning permission to live on them. Households can also rent pitches on existing private sites. Therefore, these two forms of accommodation are the equivalent to private ownership and renting for those who live in bricks and mortar housing. Generally, the majority of Travelling Showpeople yards are privately owned and managed.
- ^{4.4} The Gypsy, Traveller and Travelling Showpeople population also has other types of sites due to its mobile nature. Transit sites tend to contain many of the same facilities as a residential site, except that there is a maximum occupancy period of residence which can vary from a few days or weeks to a period of months. An alternative to a transit site is an emergency or negotiated stopping place. This type of site also has restrictions on the length of time someone can stay on it but has much more limited facilities. Both of these two types of site are designed to accommodate, for a temporary period, Gypsies, Travellers and Travelling Showpeople whilst they travel. A number of authorities also operate an accepted encampments policy where short-term stopovers are tolerated without enforcement action.

⁸ Whilst it has now been withdrawn, *Government Guidance on Designing Gypsy and Traveller Sites (2007)* recommended that, as a general guide, an average family pitch must be capable of accommodating an amenity building, a large trailer [a static caravan or park home for example] and touring caravan, parking space for two vehicles and a small garden area.

^{4.5} Further considerations for the Gypsy and Traveller population are unauthorised developments and encampments. Unauthorised developments occur on land which is owned by the Gypsies and Travellers or with the approval of the landowner, but for which they do not have planning permission to use for residential purposes. Unauthorised encampments occur on land which is not owned by the Gypsies and Travellers.

Sites and Yards in South Staffordshire

^{4.6} In South Staffordshire, at the base date for the GTAA, there were no public sites; 20 private sites (129 pitches⁹); 3 temporary sites (10 pitches); 1 tolerated site (1 pitch); and 10 unauthorised sites or unauthorised pitches on sites with planning permission (18 pitches); and 1 Travelling Showmen's yard (6 plots). There were no public transit sites identified. See **Appendix D** for further details.

Category	Sites/Yards	Pitches/Plots
Public sites	0	0
Private with permanent planning permission	20	129
Private with temporary planning permission	3	10
Tolerated sites	1	1
Unauthorised sites/pitches	10	18
Public transit sites	0	0
Travelling Showpeople yards	1	6
TOTAL	35	164

Figure 6 - Total amount of provision in South Staffordshire (August 2021)

MHCLG Traveller Caravan Count

- ^{4.7} Another source of information available on the Gypsy, Traveller and Travelling Showpeople population is the bi-annual Traveller Caravan Count which is conducted by each Local Authority in England on a specific date in January and July of each year and reported to MHCLG. This is a statistical count of the number of caravans on both authorised and unauthorised sites across England. With effect from July 2013 it was renamed the Traveller Caravan Count due to the inclusion of data on Travelling Showpeople.
- ^{4.8} As this count is of caravans and not households, it makes it more difficult to interpret for a study such as this because it does not count pitches or resident households. The count is merely a 'snapshot in time' conducted by the Local Authority on a specific day, and any unauthorised sites or encampments which occur on other dates will not be recorded. Likewise, any caravans that are away from sites on the day of the count will not be included. As such it is not considered appropriate to use the outcomes from the Traveller Caravan Count in the calculation of current and future need as the information collected during the site visits is seen as more robust and fitfor-purpose. However, the Caravan Count data has been used to *support* the identification of the need to provide for transit provision and this is set out later in this report.

⁹ This includes 8 pitches with planning permission at Oak Tree Caravan Park which are currently in breach of planning conditions. This breach is in the process of being resolved.

^{4.9} The most recent Traveller Caravan Count in January 2020 recorded 6 caravans on sites with temporary planning permission; 139 caravans on sites with permanent planning permission; and 2 caravans on land owned by Travellers that were tolerated. There were no Caravan Counts completed in July 2020 and January 2021 due to COVID-19 and the outcomes of the July 2021 count have not been published at the time of this report.

5. Stakeholder Engagement

Introduction

- ^{5.1} ORS undertook a stakeholder engagement programme to complement the information gathered through interviews with members of the Travelling Community. This consultation took the form of telephone interviews which were tailored to the role of the individual.
- ^{5.2} The aim of these interviews was to provide an understanding of current provision and possible future need; short-term encampments; transit provision; and cross-border issues.
- ^{5.3} A total of 3 interviews were undertaken with Council Officers from the study area and one interview was completed with an Officer from Staffordshire County Council.
- ^{5.4} As stated in the Planning Policy for Traveller Sites, Local Authorities have a duty to cooperate on strategic planning issues that cross administrative boundaries (S.110 Localism Act 2011). In order to explore issues relating to cross boundary working, ORS interviewed a Planning Officer from 7 neighbouring local authorities:
 - » Bromsgrove
 - » Cannock Chase
 - » Dudley
 - » Shropshire
 - » Stafford
 - » Walsall
 - » Wolverhampton
- ^{5.5} Due to issues surrounding data protection, and in order to protect the anonymity of those who took part, this section presents a summary of the views expressed by interviewees and verbatim comments have not been used. The views expressed in this section of the report represent a balanced summary of the views expressed by stakeholders, and on the views of the individuals concerned, rather than the official policy of their Council or organisation.

Views of Key Stakeholders and Council Officers in South Staffordshire

Accommodation Needs

- ^{5.6} The area is considered to be popular because of its location near the highway infrastructure (A5 and A449). Most of the existing pitches are located in the north of district including the area near the Cannock border and main highway infrastructure.
- ^{5.7} South Staffordshire adopted its Site Allocations Document (SAD) in September 2018 allocating 20 additional pitches in the district in order to meet the pitch requirements set out in the adopted Core Strategy 2012. Most of the need derives from the family growth of the existing population, and there are few applications from new families.

^{5.8} The officer explained that it is difficult to meet the need given the authority is predominantly made up of Green Belt and open countryside. There are currently many sites located within the Green Belt which have been allowed at appeal.

Short-term Encampments and Transit Provision

- ^{5.9} There are occasional roadside encampments and when they do occur it is usually just families passing through. Officers were of the view that these are not particularly problematic and are handled effectively by the enforcement team.
- ^{5.10} There are no public transit sites in South Staffordshire and no officer indicated that public transit provision was required in the area. There is some private transit provision available at the Fishponds and St James sites.

Cross Border Issues and Meeting the Duty to Cooperate

- ^{5.11} A potential issue was raised concerning families moving into South Staffordshire from Sandwell and Dudley, due to the lack of provision in those areas.
- ^{5.12} The authorities are said to work well together via Duty to Cooperate discussions with Gypsy and Traveller issues being a consistent part of the agenda.
- ^{5.13} During the Local Plan Review Issues and Options Consultation, one of the options was to consider cross-boundary options for the delivery of a new public site.

Future Priorities and Any Further Issues

- ^{5.14} It was suggested that South Staffordshire should prioritise creating small family sites for families local to the area.
- ^{5.15} It was also suggested that the Council should look to continue ensuring that there is adequate provision and that public health needs are met for the Travelling community, including access to health and education services.

Neighbouring Authorities

Bromsgrove District Council

- ^{5.16} With regard to overall accommodation need in Bromsgrove, the views of the officer interviewed were as follows:
 - » Since the last GTAA, a site with 3 pitches was approved on appeal in 2019.
 - » The 2019 GTAA Addendum found there to be a need for 17 additional Gypsy and Traveller pitches over the Local Plan period to 2030, and a need for 2 additional TSP plots for the period 2024/25-2030.
 - » There are occasional instances of unauthorised encampments in the area. However, the latest GTAA suggested there to be no need for any transit provision in the district.

- ^{5.17} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » No specific cross-border issues with neighbouring authorities in relation to Gypsies and Travellers were identified.
 - » Bromsgrove engage with neighbouring authorities wherever invited to and do so proactively for strategic planning purposes.
 - » It was thought that Bromsgrove, and neighbouring authorities, are all complying with the Duty to Cooperate.

Cannock Chase District Council

- ^{5.18} With regard to overall accommodation need in Cannock, the views of the officer interviewed were as follows:
 - » The officer interviewed believed that Cannock would benefit from providing a site which is open to all members of the community. However, the officer was not aware of any funding available to develop such a site.
 - » There has been a change of use application for 7 new pitches (reference CH/19/048), and associated works, at the former Grove Colliery, Pelsall that was refused. Cannock await further information on the status of any appeal.
 - » Unauthorised encampments were said to be infrequent, usually numbering 6 or less per year, and occur around the time of the Appleby Fair. The Council have Injunctions protecting the three most popular locations that most commonly see short-term encampments stopping.
 - In the past the Council have resorted to court action to obtain a repossession order to move an encampment on; this process can take up to three weeks. The Council has recently employed a private bailiff company to manage encampments, which is said to have resulted in encampments being moved on within 24 hours with very little clearing-up involved. Given the small numbers, and the recent improvement in the time taken to move encampments the officer was of the view that there is not a need for a transit site in Cannock Chase.
- ^{5.19} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » Regarding Duty to Co-operate discussions, neighbouring authorities were said to also be in a challenging situation in terms of trying to meet their own need. It was suggested that there would appear to be very little prospect of needs being met elsewhere.
 - » Since the use of private bailiffs, the officer was of the view that Travellers are not coming to Cannock and are staying out of the district. It is believed that many now travel to South Staffordshire, who still use repossession orders, as they know that they will be able to stay for a couple of weeks until the Council have obtained an order, rather than coming to Cannock and getting moved on within 24 hours.

Dudley Metropolitan Borough Council

- ^{5.20} With regard to overall accommodation need in Dudley, the views of the officer interviewed were as follows:
 - » Since the last GTAA, a site for 5 transit pitches and 2 permanent pitches was granted planning permission in 2019. The Council have also been liaising with representatives from the Travelling Showperson community to identify future needs and the potential for a further yard, as part of the Local Plan review.
 - » At the Caravan Count undertaken in January 2020 there was no record of unauthorised encampments. All sites with temporary planning permission have now expired and there was no record of sites being occupied.
 - » Dudley Council will be providing a transit site following approval and the Council are due to implement the site.
- ^{5.21} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » No specific cross-border issues with neighbouring authorities in relation to Gypsies and Travellers were identified.
 - » The new Black Country Plan will address the identified needs of Gypsies and Travellers over an appropriate period. The Black Country authorities have not yet been requested to address Gypsy and Traveller accommodation issues through the Duty to Cooperate process.

Shropshire Council

- ^{5.22} With regard to overall accommodation need in Shropshire, the views of the officer interviewed were as follows:
 - » Since the last GTAA, Shropshire Council have reviewed the Council land portfolio and undertaken Gypsy and Traveller community consultation to find new sites. A permanent yard for Travelling Showpeople has been identified and currently being progressed.
 - » There is a mixture of private and public sites in Shropshire. The Council has provided new pitches and redeveloped a number of existing sites in recent years in order to improve the overall accommodation on offer.
 - » There is currently 1 tolerated site and 1 temporary Travelling Showpeople yard. A private unauthorised site identified in the last GTAA no longer exists.
 - » The 2017 Shropshire GTAA has been updated. The 2019 GTAA published in February 2020 reaffirms position that there is no strategic need for additional general pitches.
 - » Unauthorised short-term encampments in Shropshire have increased despite provision of transit sites in adjoining areas. Permission has been granted for 3 transit pitches on a private site. However, currently there is no public transit provision available for encampments, although there is positive engagement between them and the Gypsy Liaison Team, with enforcement action being a last resort. Provision of a public transit site remains a priority to provide an appropriately located facility

with amenities. A public consultation is to take place on a proposed location for a temporary transit site on the outskirts of Shrewsbury.

- ^{5.23} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » It is considered that adjoining areas are generally meeting their identified need.
 - » Shropshire Council liaise with Gypsy and Traveller colleagues on a regular basis as part of the National Association of Gypsy and Traveller Officers. They also have regular communications with neighbouring authorities and seek to respond and engage in Duty to Cooperate requests. Therefore, Shropshire and neighbouring authorities were all suggested to be complying with the Duty to Cooperate.

Stafford Borough Council

- ^{5.24} With regard to overall accommodation need in Stafford, the views of the officer interviewed were as follows:
 - » Since the last GTAA, Stafford Council adopted the Local Plan Part 2 in January 2017 and the Council have been looking to identify a suitable site to cover the new plan period. The Council have also been receiving sites through the Strategic Housing and Employment Land Availability Assessment which was published in December 2018.
 - » There is a current need of 43 pitches and there is provision for 36. Finding the pitches to account for the outstanding need will be part of the work for the new Local Plan, meaning that Stafford have five-year supply. ORS are currently in the process of completing a new GTAA for Stafford and it is expected to be published later in 2020.
 - » Stafford experience unauthorised encampments throughout the year but the volume was not thought to be enough to require large transit sites. However, it was noted that safe stopping places are needed as the only locations available to mobile groups are potentially hazardous.
- ^{5.25} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » Stafford have received requests from neighbouring authorities asking to help meet the identified need within those authorities; suggesting that some neighbouring authorities cannot fully meet their need.
 - » Stafford have previously engaged in cross-border work with neighbouring authorities to produce joint GTAA's. Stafford Council remain open to working with neighbouring authorities in the future.
 - » If was felt that Stafford Borough Council and the neighbouring authorities are all complying with the Duty to Cooperate.

Walsall Metropolitan Borough Council

- ^{5.26} With regard to overall accommodation need in Walsall, the views of the officer interviewed were as follows:
 - » Since the last GTAA, Walsall have adopted a Site Allocation Document which safeguards existing sites and allocates new ones in order to meet any identified need to the end of the plan period in 2026.
 - » The requirement for additional Travelling Showpeople sites identified both in the 2008 and 2017 GTAAs would appear to exceed need. Walsall has a large population of Showpeople, although many are retired and are therefore unlikely to generate significant household growth. The Showmen's Guild have indicated that they have no interest in at least two of the potential new sites identified in the Site Allocation Document.
 - » Over the period 2015-2019 there have been between 50 and 100 unauthorised encampments per year. Most of these have been short term transit encampments.
- ^{5.27} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:
 - » No specific cross-border issues with neighbouring authorities in relation to Gypsies and Travellers were identified.
 - » Walsall and the other Black Country authorities are facing a shortfall of land for general housing as they are constrained by most of the undeveloped land comprising of Green Belt. Walsall are therefore seeking to export some of their housing need to neighbouring authorities. As Gypsy and Traveller sites form a sub-set of the housing need, Walsall would therefore welcome support from neighbours in accommodating some of that need.

Wolverhampton City Council

- ^{5.28} With regard to overall accommodation need in Wolverhampton, the views of the officer interviewed were as follows:
 - » As set out in the Black Country & South Staffordshire GTAA, the main provision for Gypsies and Travellers is a large site owned by Wolverhampton Council, and managed by the Gypsy Council, which provides 40 pitches. There is also one Travelling Showperson's yard which is sufficient to meet current needs.
 - » Since the last GTAA, the Council have added to accommodation provision for Gypsies and Travellers through allocating a site in the Stafford Road Corridor. A site and the necessary funding have also been identified to deliver a transit site in central Wolverhampton. Permission has also been granted for an extension of the existing Travelling Showpeople yard in central Wolverhampton.
 - » Wolverhampton has enough low-cost land for small windfall sites to be brought forward in the future, as and when they are required by the Gypsy and Traveller community.
- ^{5.29} With regard to the subject of cross border issues and the Duty to Cooperate, the views of the officer interviewed were as follows:

- » No specific cross-border issues with neighbouring authorities in relation to Gypsies and Travellers were identified.
- » It was thought that Wolverhampton and all neighbouring authorities are complying with the Duty to Cooperate
- » The Black Country authorities have not yet been requested to address Gypsy and Traveller accommodation issues through the Duty to Cooperate process.

6. Survey of Travelling Communities

Interviews with Gypsies and Travellers

- ^{6.1} One of the major components of this study was a detailed survey of the Gypsy and Traveller population living in the study area, and also efforts to engage with the bricks and mortar community.
- ^{6.2} Through the desk-based research and stakeholder interviews ORS identified no public sites; 20 private sites with permanent planning permission; 3 private sites with temporary planning permission; 1 site that is tolerated for planning purposes; 10 unauthorised sites or unauthorised pitches on sites with planning permission; and 1 Travelling Showman's Yard.
- ^{6.3} The table below sets out the number of pitches/plots, the number of interviews that were completed, and the reasons why interviews were not completed.
- ^{6.4} It should be noted that there was 1 vacant pitch, 8 unimplemented and some double pitches.This gives an adjusted response rate of 79%.
- ^{6.5} During the period between commencing the GTAA and reporting no further transient households were identified to interview other than those who were interviewed.

Interviews with Gypsies and Travellers in Bricks and Mortar

^{6.6} Following all of the efforts that were made it was possible to identify and interview 4 households living in bricks and mortar. One was at Granary Cottage included in the table above, one was at Brickyard Cottage included in the table above, and two were through proxy interviews.

7. Current and Future Pitch Provision

Introduction

- ^{7.1} This section focuses on the pitch provision which is needed in the study area currently and to 2038. This includes both current unmet need and need which is likely to arise in the future¹⁰. This time period allows for robust forecasts of the requirements for future provision, based upon the evidence contained within this study and also secondary data sources. Whilst the difficultly in making accurate assessments beyond 5 years has been highlighted in previous studies, the approach taken in this study to estimate new household formation has been accepted by Planning Inspectors as the most appropriate methodology to use.
- ^{7.2} We would note that this section is based upon a combination of the on-site surveys, planning records and stakeholder interviews. In many cases, the survey data is not used in isolation, but instead is used to validate information from planning records or other sources.
- ^{7.3} This section concentrates not only upon the total provision which is required in the area, but also whether there is a need for any transit sites and/or emergency stopping place provision.

New Household Formation Rates

- ^{7.4} Nationally, a household formation and growth rate of 3.00% net per annum¹¹ has been commonly assumed and widely used in local Gypsy and Traveller assessments, even though there is no statistical evidence of households growing so quickly. The result has been to inflate both national and local requirements for pitches unrealistically. In this context, ORS prepared a *Technical Note on Gypsy and Traveller Household Formation and Growth Rates* in 2015 and updated the Note in June 2020. The main conclusions are set out here and the full paper is in **Appendix F**.
- ^{7.5} Those seeking to provide evidence of high annual net household growth rates for Gypsies and Travellers have sometimes sought to rely on increases in the number of caravans, as reflected in caravan counts. However, caravan count data is unreliable and erratic – so the only proper way to project future population and household growth is through demographic analysis.
- ^{7.6} The Technical Note concludes that in fact, the growth in the national Gypsy and Traveller population may be as low as 1.25% per annum much less than the 3.00% per annum often assumed, but still greater than in the settled community. Even using extreme and unrealistic assumptions, it is hard to find evidence that net Gypsy and Traveller population and household growth rates are above 2.00% per annum nationally.
- ^{7.7} The often assumed 3.00% per annum net household growth rate is unrealistic and would require clear statistical evidence before being used for planning purposes. In practice, the best available evidence supports a national net household growth rate of 1.50% per annum for Gypsies and

¹⁰ See Paragraphs 3.41 and 3.42 for details of components on current and future need.

¹¹ Page 25, Gypsy and Traveller Accommodation Needs Assessments – Guidance (DCLG – 2007) Now withdrawn.

Travellers (in addition research by ORS has identified a national growth rate of 1.00% for Travelling Showpeople) and this has also been adjusted locally based on site demographics.

^{7.8} This view has been supported by Planning Inspectors in a number of Decision Notices. The Inspector for an appeal in Doncaster that was issued in November 2016 (Ref: APP/F4410/W/15/3133490) where the agent acting on behalf of the appellant claimed that a rate closer to 3.00% should be used concluded:

In assessing need account also needs to be taken of likely household growth over the coming years. In determining an annual household growth rate, the Council relies on the work of Opinions Research Services (ORS), part of Swansea University. ORS's research considers migration, population profiles, births & fertility rates, death rates, household size data and household dissolution rates to determine average household growth rates for gypsies and travellers. The findings indicate that the average annual growth rate is in the order of 1.50% but that a 2.50% figure could be used if local data suggest a relatively youthful population. As the Council has found a strong correlation between Doncaster's gypsy and traveller population age profile and the national picture, a 1.50% annual household growth rate has been used in its 2016 GTANA. Given the rigour of ORS's research and the Council's application of its findings to the local area I accept that a 1.50% figure is justified in the case of Doncaster.

^{7.9} Another more recent was in relation to an appeal in Guildford that was issued in March 2018 (Ref: APP/W/16/3165526) where the agent acting on behalf of the appellant again claimed that a rate closer to 3.00% should be used. The Inspector concluded:

There is significant debate about household formation rates and the need to meet future growth in the district. The obvious point to make is that this issue is likely to be debated at the local-plan examination. In my opinion, projecting growth rates is not an exact science and the debate demonstrates some divergence of opinion between the experts. Different methodologies could be applied producing a wide range of data. However, on the available evidence it seems to me that the figures used in the GTAA are probably appropriate given that they are derived by using local demographic evidence. In my opinion, the use of a national growth rate and its adaptation to suit local or regional variation, or the use of local base data to refine the figure, is a reasonable approach.

- ^{7.10} In addition, the Technical Note has recently been accepted as a robust academic evidence base and has been published by the Social Research Association in its journal Social Research Practice in December 2017. The overall purpose of the journal is to encourage and promote high standards of social research for public benefit.
- ^{7.11} ORS assessments take full account of the net local household growth rate per annum calculated on the basis of demographic evidence from the site surveys, and the 'baseline' includes all current authorised households, all households identified as in current need (including concealed households, movement from bricks and mortar and those on waiting lists not currently living on a pitch or plot), as well as households living on tolerated unauthorised pitches or plots who are not included as current need. The assessments of future need also take account of modelling projections based on birth and death rates, household dissolution, and in-/out-migration.
- ^{7.12} Overall, the household growth rate used for the assessment of future needs has been informed by local evidence. This demographic evidence has been used to adjust the national growth rate

of 1.50% up or down based on the proportion of those aged under 18 (by planning status). In South Staffordshire this approach has been taken to determine the new household formation rate for households that did not meet the planning definition. 35% of residents were aged under 18. This demographic evidence is slightly lower than the ORS national growth rate of 1.50% (which is based on 36% aged under 18). Therefore, an adjusted rate of 1.45% has been used based on the proportion of those aged under 18 in households that did not meet the planning definition in South Staffordshire.

- ^{7.13} In certain circumstances where the numbers of households and children are low, or the population age structure is skewed by certain age groups, it is not appropriate to apply a percentage rate for new household formation. In these cases, a judgement has been made on likely new household formation based on the age and gender of the children. This is based on the assumption that 50% of households likely to form will stay in the area based on evidence from other GTAAs that ORS have completed across England and Wales. This approach has been taken to determine levels of new household formation for households that met the planning definition. This is due to a significantly higher number of children aged between 3 and 7 in households in South Staffordshire that met the planning definition. This approach has also been used for Travelling Showmen due to very low number of children.
- ^{7.14} The ORS national formation rate of 1.50% has been applied to undetermined households in the absence of any demographic data for these households.
- ^{7.15} Overall new household formation for those that met and did not meet the planning definition has also been adjusted to take account of teenagers in need of a pitch in the next 5 years who have already been identified as components of need. This eliminates any double counting in the assessment of need.

Breakdown by 5 Year Bands

^{7.16} In addition to tables which set out the overall need for Gypsies and Travellers, the overall need has also been broken down by 5-year bands as required by PPTS (2015). The way that this is calculated is by including all current need (from unauthorised pitches, pitches with temporary planning permission, concealed and doubled-up households, 5 year need from teenage children, and net movement from bricks and mortar) in the first 5 years. In addition, the total net new household formation is split across the GTAA period based on the compound rate of growth that was applied rather than being split equally over time.

Applying the Planning Definition

7.17 The outcomes from the household interviews were used to determine the status of each household against the planning definition in PPTS (2015). This assessment was based on the responses to the questions given to Researchers. Only those households that met the planning definition, in that they were able to provide information during the household interview that household members travel for work purposes, or for seeking work, and stay away from their usual place of residence when doing so – or that they have ceased to travel temporarily due to education, ill health or old age, form the components of need that will form the baseline of need in the GTAA. Households where an interview was not completed who may meet the planning definition have also been included as a potential additional component of need from undetermined households. Whilst they do not need to be formally considered in the GTAA, need

from households that did not meet the planning definition has also been assessed to provide the Councils with information on levels of need that will have to be considered as part of the wider housing needs of the area and through separate Local Plan Policies.

^{7.18} The information used to assess households against the planning definition included information on whether households have ever travelled; why they have stopped travelling; the reasons that they travel; and whether they plan to travel again in the future and for what reasons. The table below sets out the planning status of households that were interviewed for the South Staffordshire GTAA. This includes any hidden households that were identified during the household interviews including concealed and doubled-up households or single adults and accepted in-migration. It is important to note that this is a table setting out household numbers and not pitch numbers.

Status	Meet Planning Definition	Undetermined	Do Not Meet Planning Definition
Gypsies and Travellers			
Public Sites	0	0	0
Private Sites	89	27	27
Temporary	12	0	3
Tolerated	1	0	0
Unauthorised	17	1	0
Bricks and Mortar	3	0	2
Roadside	2	0	0
Sub-Total	124	28	32
Travelling Showpeople	6	0	0
Sub-Total	6	0	0
TOTAL	130	28	32

Figure 8 – Planning status of households in South Staffordshire

- ^{7.19} Figure 8 shows that for Gypsies and Travellers, 124 households met the planning definition of a Traveller, and for Travelling Showpeople 6 households met the planning definition in that ORS were able to determine that household members travel for work purposes, or for seeking work, and stay away from their usual place of residence or have ceased to travel temporarily.
- ^{7.20} A total of 32 Gypsy and Traveller households did not meet the planning definition as they were not able to demonstrate that they travel away from their usual place of residence for the purpose of work, or that they have ceased to travel temporarily due to children in education, ill health, or old age. Some did travel for cultural reasons, to visit relatives or friends, and others had ceased to travel permanently.
- ^{7.21} It was not possible to make contact with 28 households as they were not present during the extended fieldwork period. However, the majority of those who were not present during the fieldwork period were in areas where high numbers of non-Travellers were found to be living, or on sites where the pitches may have been used as transit pitches.

Interviews with Gypsies and Travellers in Bricks and Mortar

^{7.22} Following all of the efforts that were made, it was possible to identify and interview 4 households living in bricks and mortar.

Migration/Roadside

- ^{7.23} The study has also sought to address in-migration (households requiring accommodation who move into the study area from outside) and out-migration (households moving away from the study area). Site surveys typically identify only small numbers of in-migrant and out-migrant households and the data is not normally robust enough to extrapolate long-term trends. At the national level, there is nil net migration of Gypsies and Travellers across the UK, but the assessment has taken into account local migration effects on the basis of the best evidence available.
- ^{7.24} Evidence drawn from stakeholder and household interviews has been considered alongside assessments of need that have been completed in other nearby local authorities. The household interviews identified 1 household living in another local authority who need to move back to a family site in South Staffordshire: and 2 households living on the roadside in South Staffordshire due to a lack of space on a family site.
- ^{7.25} The household interviews also identified a total of 36 households who are currently living in other local authorities who have a desire to move to a site in South Staffordshire. However, as no need was identified, these households have not been included as components of demand in this assessment.
- ^{7.26} ORS have found no firm evidence from other local studies that have been completed recently of any additional households wishing to move to South Staffordshire. Therefore, apart from the identified in-migration and roadside need, net migration to the sum of zero has been assumed for the GTAA – which means that net pitch requirements are driven by locally identifiable need rather than speculative modelling assumptions.
- ^{7.27} It is important to note that any future demand for new sites or additional pitches as a result of in-migration should be seen as windfall need and should be dealt with by a criteria-based development management policy. This additional need should not be assessed against levels of need identified in the GTAA or to contribute towards 5-year supply to meet this need.

Pitch Needs – Gypsies and Travellers that meet the Planning Definition

- ^{7.28} The 124 households that met the planning definition were found on private, temporary, tolerated, and unauthorised sites, as well as living in bricks and mortar and living on the roadside. Analysis of the household interviews indicated that there is a current need from 16 unauthorised pitches; and for 25 pitches from concealed or doubled-up households or adults. Future need has been identified for 21 pitches for teenage children who are in need of a pitch of their own in the next 5 years; from 7 households on temporary pitches; for 3 households from inmigration/roadside; and for 49 pitches as a result of new household formation, derived from the demographics of the residents. Therefore, the overall level of need for those households who met the planning definition of a Gypsy or Traveller is for **121 pitches** over the GTAA period.
- ^{7.29} Whilst there were a total of 9 pitches on sites with permanent planning permission that were either vacant, unimplemented or under development, these were all on private sites and are not considered to be available supply as required by the PPTS. However, it is anticipated that these pitches will meet some of the current and future need identified from these sites.

Gypsies and Travellers - Meeting Planning Definition	Pitches
Supply of Pitches	
Supply from vacant public and private pitches	0
Supply from pitches on new sites	0
Pitches vacated by households moving to bricks and mortar	0
Pitches vacated by households moving away from the study area	0
Total Supply	0
Current Need	
Households on unauthorised developments	16
Households on unauthorised encampments	0
Concealed households/Doubling-up/Over-crowding	25
Movement from bricks and mortar	0
Households on waiting lists for public sites	0
Total Current Need	41
Future Need	
5 year need from teenage children	21
Households on sites with temporary planning permission	7
In-migration/roadside	3
New household formation	49
(Formation from household demographics)	
Total Future Needs	80
Net Pitch Need = (Current and Future Need – Total Supply)	121

Figure 9 – Need for Gypsy and Traveller households in South Staffordshire that met the Planning Definition (2021-38)

Figure 10 – Need for Gypsy and Traveller households in South Staffordshire that met the Planning Definition by 5-year periods

Years	0-5 2021-25	6-10 2026-30	11-15 2031-35	16-18 2036-38	Total
	72	11	24	14	121

Pitch Needs – Undetermined Gypsies and Travellers

- ^{7.30} Whilst it was not possible to determine the planning status of a total of 28 households as they were not on site at the time of the fieldwork, the needs of these households still need to be recognised by the GTAA as they are believed to be Gypsies and Travellers and may meet the planning definition.
- ^{7.31} ORS are of the opinion that it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether or not households where an interview was not completed meet the planning definition based on the outcomes of households in that local authority where an interview was completed.
- ^{7.32} However, data that has been collected from over 5,000 household interviews that have been completed by ORS since the changes to PPTS in 2015 suggests that nationally approximately 30% of households that have been interviewed meet the planning definition.
- ^{7.33} This would suggest that it is likely that only a proportion of the potential need identified from these undetermined households will need conditioned Gypsy and Traveller pitches, and that the needs of the majority will need to be addressed through other means.
- ^{7.34} Should further information be made available to the Council that will allow for the planning definition to be applied to the undetermined households, the overall level of need could rise by up to 1 from unauthorised pitches and by up to 8 from new household formation (this uses a base of the 28 households and the ORS national net growth rate of 1.50%¹²). Therefore, **need could increase by up to a further 9 pitches**, plus any concealed adult households or 5-year need arising from teenagers living in these households if all 28 undetermined pitches are deemed to meet the planning definition. However, as an illustration, if the ORS national average of 30% were to be applied this could be as few as 3 pitches. If the locally derived proportion of households that met the planning definition (79%) were to be applied this could rise to 7 pitches.
- ^{7.35} Tables setting out the components of need for undetermined households can be found in **Appendix B**.

Pitch Needs - Gypsies and Travellers that do not meet the Planning Definition

^{7.36} It is not now a requirement for a GTAA to include an assessment of need for households that did not meet the planning definition. However, this assessment is included for illustrative purposes, to help fulfil the requirements of the Housing Act (1985)¹³ and to provide the Council with information on levels of need that will have to be addressed through separate Local Plan Policies. On this basis, it is evident that whilst the needs of the 32 households who did not meet the planning definition will represent only a very small proportion of the overall housing need, the Council will still need to ensure that arrangements are in place to properly address these needs

¹² The ORS *Technical Note on Population and Household Growth (2020)* has identified a national growth rate of 1.50% for Gypsies and Travellers which has been applied in the absence of further demographic information about these households.

¹³ See Paragraph 3.34 for details.

– especially as many identified as Irish and Romany Gypsies and may claim that the Council should meet their housing needs through culturally appropriate housing.

7.37 Analysis of the household interviews indicated that there is a current need from 8 concealed or doubled-up households or single adults; and 2 movement from bricks and mortar. The future need identified is for 5 from teenagers who will need a pitch of their own in the next 5 years; 2 from households on sites with temporary planning permission; and 7 from new household formation using a rate of 1.45% derived from the household demographics. Therefore, the overall level of need for those households who did not meet the planning definition of a Gypsy or Traveller is for 24 pitches over the GTAA period. A summary of this need for households that did not meet the planning definition can be found in Appendix C.

Travelling Showpeople Needs

Plot Needs – Travelling Showpeople

- ^{7.38} There was 1 Travelling Showperson's yard identified in South Staffordshire and interviews were completed with all 6 of the households all met the planning definition.
- ^{7.39} Analysis of the household interviews for households that met the planning definition indicated that there is a need for 3 plots from new household formation derived from the household demographics. Therefore, the overall level of need for those households who met the planning definition of a Travelling Showperson is for **3 plots** over the GTAA period.

Figure 11 – Need for Travelling Showpeople households in South Staffordshire that met the Planning Definition (2021-38)

Travelling Showpeople - Meeting Planning Definition	Pitches
Supply of Plots	
Supply from vacant public and private plots	0
Supply from pitches on new yards	0

Transit Requirements

^{7.40} When determining the potential need for transit provision the assessment has looked at data from the MHCLG Traveller Caravan Count, the outcomes of the stakeholder interviews and records on numbers of unauthorised encampments, and the potential wider issues related to changes made to PPTS in 2015.

MHCLG Traveller Caravan Count

- ^{7.41} Whilst it is considered to be a comprehensive national dataset on numbers of authorised and unauthorised caravans across England, it is acknowledged that the Traveller Caravan Count is a count of caravans and not households. It also does not record the reasons for unauthorised caravans. This makes it very difficult to interpret in relation to assessing future need because it does not count pitches or resident households. The count is also only a twice yearly (January and July) 'snapshot in time' conducted by local authorities on a specific day, and any caravans on unauthorised sites or encampments which occur on other dates are not recorded. Likewise, any caravans that are away from sites on the day of the count are not included. As such it is not considered appropriate to use the outcomes from the Traveller Caravan Count in the assessment of future transit provision. It does however provide valuable historic and trend data on whether there are instances of unauthorised caravans in local authority areas.
- ^{7.42} Data from the Traveller Caravan Count shows that there have been no non-tolerated unauthorised caravans on land not owned by Travellers recorded in the study area in recent years.

Stakeholder Interviews and Local Data

- ^{7.43} Whilst there is currently no public transit provision in South Staffordshire, the fieldwork identified a small number of private sites where there are private transit pitches.
- ^{7.44} Information from the stakeholder interviews identified that there are occasional encampments, but that these are household passing through and that they are dealt with effectively by the Councils Enforcement Team.

Transit Recommendations

- ^{7.45} Due to low historic low numbers of unauthorised encampments, and the existence of private transit pitches, it is not recommended that there is a need for a formal public transit site in South Staffordshire at this time.
- ^{7.46} The situation relating to levels of unauthorised encampments should be monitored whilst any potential changes associated with PPTS (2015) develop for example a potential increase in the number of households travelling to seek to meet the current planning definition.
- 7.47 As well as information on the size and duration of the encampments, this monitoring should also seek to gather information from residents on the reasons for their stay in the local area; whether they have a permanent base or where they have travelled from; whether they have any need or preference to settle permanently in the local area; and whether their travelling is a result of

changes to PPTS (2015). This information could be collected as part of a Welfare Assessment (or similar).

- ^{7.48} It is recommended that a review of the evidence base relating to unauthorised encampments, including the monitoring referred to above, should be undertaken on a Staffordshire-wide basis. This will establish whether there is a need for investment in any new transit provision or emergency stopping places, or whether a managed approach is preferable.
- ^{7.49} In the short-term the Council should continue to use its current approach when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements could also be considered.
- ^{7.50} The term 'negotiated stopping' is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent 'built' transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the Council and the (temporary) residents regarding expectations on both sides. See www.leedsgate.co.uk for further information.
- ^{7.51} Temporary stopping places can be made available at times of increased demand due to fairs or cultural celebrations that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.

8. Conclusions

^{8.1} This study provides a robust evidence base to enable the Council to assess the housing needs of the Travelling Community as well as complying with their requirements towards Gypsies, Travellers and Travelling Showpeople under the Housing Act 1985, Planning Policy for Traveller Sites (PPTS) 2015, the Housing and Planning Act 2016, the revised National Planning Policy Framework (NPPF) 2021, and Planning Practice Guidance (PPG) 2021. It also provides the evidence base which can be used to support Local Plan Policies.

Gypsies and Travellers

- ^{8.2} In summary there is a need for:
 - » 121 pitches in South Staffordshire over the GTAA period to 2038 for Gypsy and Traveller households that met the planning definition.
 - » 9 pitches for undetermined Gypsy and Traveller households that may meet the planning definition.
 - » 24 pitches for Gypsy and Traveller households who did not meet the planning definition.
- ^{8.3} In general terms need identified in a GTAA is seen as need for pitches. As set out in Chapter 4 of this report, the now withdrawn *Government Guidance on Designing Gypsy and Traveller Sites* recommended that, as a general guide, an average family pitch must be capable of accommodating an amenity building, a large trailer and touring caravan, parking space for two vehicles and a small garden area.
- ^{8.4} It is recommended that alternative approaches should be considered when seeking to address the levels of need identified in this GTAA, especially when seeking to meet the need through the intensification or expansion of existing sites.
- ^{8.5} The first approach to consider is in relation to single concealed or doubled-up adults and teenagers who will be in need of a pitch of their own in the next 5 years. In the short to medium term it is likely that the accommodation need of these individuals could be met through additional touring caravans on existing sites which are, generally, each equivalent to the provision of a pitch, as opposed to more formally set out pitches.
- ^{8.6} The second approach to consider is for sites occupied by larger extended family groups. Again, sites like this may be able to meet the overall accommodation needs through a combination of shared static caravans, tourers and dayrooms on existing sites which are, generally, each equivalent to the provision of a pitch as opposed to more formally set out sites with separate pitches. It is common for conditions in Decision Notices for Travellers sites to simply place limits on the numbers and types of caravans as opposed to placing limits on the number of pitches.
- ^{8.7} Future need from new household formation could also be met through natural turnover of pitches over time.
- ^{8.8} It is recommended that need for households that met the PPTS planning definition is addressed through new pitch allocations and the intensification or expansion of existing sites – considering some of the alternative approaches set out above. Given that all of identified need comes from

households living on private sites it is likely that it will need to be addressed through the provision of private pitches or sites.

- ^{8.9} The Council will need to carefully consider how to address any needs from undetermined households, from households seeking to move to South Staffordshire (in-migration), or from households currently living in bricks and mortar. In terms of Local Plan Policies, the Council should consider the use of a criteria-based policy (as suggested in PPTS).
- ^{8.10} In general terms, it is the Government's intention that the need for those households who do not fall within the PPTS planning definition should be met as part of general housing need and through separate Local Plan Housing Policies this is consistent with the revised NPPF.
- ^{8.11} It is recognised that the Council already has in place an adopted Local Plan that sets out overall housing need. As this plan is reviewed the findings of this report should be considered as part of future housing mix and type within the context of the assessment of overall housing need in relation to Gypsies and Travellers. Whilst the findings in this report are aggregated totals for the whole of South Staffordshire due to data protection issues, the Council have more detailed data to enable accurate Local Plan allocation to be made.

Travelling Showpeople

^{8.12} The GTAA identifies a need for 3 plots for households that met the planning definition. There was no need identified for undermined households or households that do not meet the definition.

Transit Provision

- ^{8.13} Due to low historic low numbers of unauthorised encampments, and the existence of private transit pitches, it is not recommended that there is a need for a formal public transit site in South Staffordshire at this time. However, there is a need for a more strategic approach to transit provision across Staffordshire to consider the establishment of a network of emergency stopping places to enable the Police to use their powers to move household on.
- ^{8.14} In the short-term the Council should continue to use its current approach when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements could also be considered.

Summary of Need to be Addressed – Gypsies and Travellers

- ^{8.15} Taking into consideration all of the elements of need that have been assessed, together with the assumptions on the proportion of undetermined households that are likely to meet the planning definition, the table below sets out the likely number of pitches that will need to be addressed either as a result of the GTAA, or through the Councils Housing Need Assessment (HNA) process and through separate Local Plan Policies.
- ^{8.16} Total need from Gypsies and Travellers in South Staffordshire that met the planning definition, from undetermined households that may meet the planning definition; and from households that did not meet the planning definition is for 154 pitches.
- ^{8.17} The tables below break total need down by:
 - » The number that met the planning definition.

- » The likely proportion of need from undetermined households that will meet the planning definition. It does this by taking 30% (the ORS national average of Gypsies and Travellers that meet the planning definition) of need from undetermined households and 79% (the locally derived proportion that met the planning definition).
- » The number that did not meet the planning definition.
- The likely proportion of need from undetermined households that will not meet the planning definition. It does this by taking 70% (the ORS national average of Gypsies and Travellers that do not meet the planning definition) of need from undetermined households and 21% (the locally derived proportion that did not met the planning definition).
- ^{8.18} Need from households that meet or are likely to meet the planning definition will need to be addressed through a Gypsy and Traveller Local Plan Policy through a combination of pitch allocations and through a Criteria-Based Policy.
- ^{8.19} Need for households that did not meet the planning definition will need to be met through other Local Plan Housing Policies.

Appendix A: Glossary of Terms / Acronyms used

Amenity block/shed	A building where basic plumbing amenities (bath/shower, WC, sink) are provided.
Bricks and mortar	Mainstream housing.
Caravan	Mobile living vehicle used by Gypsies and Travellers. Also referred to as trailers.
Chalet	A single storey residential unit which can be dismantled. Sometimes referred to as mobile homes.
Concealed household	Households, living within other households, who are unable to set up separate family units.
Doubling-Up	Where there are more than the permitted number of caravans on a pitch or plot.
Emergency Stopping Place	A temporary site with limited facilities to be occupied by Gypsies and Travellers while they travel.
Green Belt	A land use designation used to check the unrestricted sprawl of large built-up areas; prevent neighbouring towns from merging into one another; assist in safeguarding the countryside from encroachment; preserve the setting and special character of historic towns; and assist in urban regeneration, by encouraging the recycling of derelict and other urban land.
Household formation	The process where individuals form separate households. This is normally through adult children setting up their own household.
In-migration	Movement of households into a region or community
Local Plans	Local Authority spatial planning documents that can include specific policies and/or site allocations for Gypsies, Travellers and Travelling Showpeople.
Out-migration	Movement from one region or community in order to settle in another.
Personal planning permission	A private site where the planning permission specifies who can occupy the site and doesn't allow transfer of ownership.
Pitch/plot	Area of land on a site/development generally home to one household. Can be varying sizes and have varying caravan numbers. Pitches refer to Gypsy and Traveller sites and Plots to Travelling Showpeople yards.
Private site	An authorised site owned privately. Can be owner- occupied, rented or a mixture of owner-occupied and rented pitches.

<u></u>	
Site	An area of land on which Gypsies, Travellers and
	Travelling Showpeople are accommodated in
	caravans/chalets/vehicles. Can contain one or
	multiple pitches/plots.
Social/Public/Council Site	An authorised site owned by either the local
	authority or a Registered Housing Provider.
Temporary planning permission	A private site with planning permission for a fixed
	period of time.
Tolerated site/yard	Long-term tolerated sites or yards where
	enforcement action is not expedient, and a
	certificate of lawful use would be granted if sought.
Transit provision	Site intended for short stays and containing a range
	of facilities. There is normally a limit on the length
	of time residents can stay.
Unauthorised Development	Caravans on land owned by Gypsies and Travellers
	and without planning permission.
Unauthorised Encampment	Caravans on land not owned by Gypsies and
-	Travellers and without planning permission.
Waiting list	Record held by the local authority or site managers
	of applications to live on a site.
Yard	A name often used by Travelling Showpeople to
	refer to a site.

Household Growth Rates

Abstract and Conclusions

- ^{1.} National and local household formation and growth rates are important components of Gypsy and Traveller accommodation assessments, but until 2013 little detailed work had been done to assess their likely scale. ORS undertook work in 2013 to assess the likely rate of demographic growth for the Gypsy and Traveller population and concluded that the figure could be as low 1.25% per annum, but that best available evidence supports a national net household growth rate of 1.50% per annum.
- ^{2.} This analysis was produced as a separate document in 2013 and then updated in 2015 (<u>www.opinionresearch.co.uk/formation2015</u>) in light of comments from academics, planning agents and local authorities. The 2015 document was complex because there was still serious dispute as to the level of demographic growth for Gypsies and Travellers in 2015. However, ORS now consider these disputes have largely been resolved at Planning Appeals and Local Plan Examinations, so we consider that much of the supporting evidence is now no longer required to be in the document.
- ^{3.} This current document represents a shortened re-statement to our findings in 2015 to allow for easier comprehension of the issues involved. It contains no new research and if reader wishes to see further details of the supporting information, they should review the more detailed 2015 report.

Introduction

^{4.} Compared with the general population, the relative youthfulness of many Gypsy and Traveller populations means that their birth rates are likely to generate higher-than-average population growth, and proportionately higher gross household formation rates. However, while their gross rate of household growth might be high, Gypsy and Traveller communities' future accommodation needs are, in practice, affected by any reduction in the number of households due to dissolution and/or by movements in/out of the area and/or by transfers into other forms of housing. Therefore, the *net* rate of household growth is the gross rate of formation minus any reductions in households due to such factors.

Modelling Population and Household Growth Rates

^{5.} The basic equation for calculating the rate of Gypsy and Traveller population growth seems simple: start with the base population and then calculate the average increase/decrease by allowing for births, deaths, in-/out-migration and household dissolution. Nevertheless, deriving satisfactory estimates is difficult because the evidence is often tenuous – so, in this context in 2013, ORS modelled the growth of the national Gypsy and Traveller population based on the most likely birth and death rates, and by using PopGroup (the leading software for population and household forecasting). To do so, we supplemented the available national statistical sources with data derived from our own surveys.

Migration Effects

^{6.} Population growth is affected by national net migration and local migration (as Gypsies and Travellers move from one area to another). In terms of national migration, the population of Gypsies and Travellers is relatively fixed, with little international migration. It is in principle possible for Irish Travellers (based in Ireland) to move to the UK, but there is no evidence of this happening to a significant extent and the vast majority of Irish Travellers were born in the UK or are long-term residents.

Population Profile

^{7.} The main source for the rate of Gypsy and Traveller population growth is the UK 2011 Census. The ethnicity question in the 2011 Census included for the first time 'Gypsy and Irish Traveller' as a specific category. While non-response bias probably means that the size of the population was underestimated, the age profile the Census provides is not necessarily distorted and matches the profile derived from ORS's extensive household surveys.

Age Group	Number of People	Cumulative Percentage
Age 0 to 4	5,725	10.4
Age 5 to 7	3,219	16.3
Age 8 to 9	2,006	19.9
Age 10 to 14	5,431	29.8
Age 15	1,089	31.8
Age 16 to 17	2,145	35.7
Age 18 to 19	1,750	38.9
Age 20 to 24	4,464	47.1
Age 25 to 29	4,189	54.7
Age 30 to 34	3,833	61.7
Age 35 to 39	3,779	68.5
Age 40 to 44	3,828	75.5
Age 45 to 49	3,547	82.0
Age 50 to 54	2,811	87.1
Age 55 to 59	2,074	90.9
Age 60 to 64	1,758	94.1
Age 65 to 69	1,215	96.3
Age 70 to 74	905	97.9
Age 75 to 79	594	99.0
Age 80 to 84	303	99.6
Age 85 and over	230	100.0

 Table 1 - Age Profile for the Gypsy and Traveller Community in England (Source: UK Census of Population 2011)

Birth and Fertility Rates

- 8. The table above provides a way of understanding the rate of population growth through births. The table shows that surviving children aged 0-4 years comprise 10.4% of the Gypsy and Traveller population which means that, on average, 2.1% of the total population was born each year (over the last 5 years). The same estimate is confirmed if we consider that those aged 0-14 comprise 29.8% of the Gypsy and Traveller population which also means that almost exactly 2% of the population was born each year.
- ^{9.} The total fertility rate (TFR) for the whole UK population is just below 2 which means that on average each woman can be expected to have just less than two children who reach adulthood. We know of only one estimate of fertility rates of the UK Gypsy and Traveller community, in *'Ethnic identity and inequalities in*

Britain: The dynamics of diversity' by Dr Stephen Jivraj and Professor Ludi Simpson (published May 2015). The authors use the 2011 Census data to estimate the TFR for the Gypsy and Traveller community as 2.75.

^{10.} ORS used our own multiple survey data to investigate the fertility rates of Gypsy and Traveller women. The ORS data shows that on average Gypsy and Traveller women aged 32 years have 2.5 children (but, because the children of mothers above this age point tend to leave home progressively, full TFRs were not completed). On this basis it is reasonable to infer an average of 3 children per woman during her lifetime, which is broadly consistent with the estimate of 2.75 children per woman derived from the 2011 Census.

Death Rates

- ^{11.} Although the above data imply an annual growth rate through births of about 2%, the death rate has also to be taken into account. Whereas the average life expectancy across the whole population of the UK is currently just over 80 years, a Sheffield University study found that Gypsy and Traveller life expectancy is about 10-12 years less than average (Parry et al (2004) '*The Health Status of Gypsies and Travellers: Report of Department of Health Inequalities in Health Research Initiative*', University of Sheffield).
- ^{12.} Therefore, in our population growth modelling we used a conservative estimate of average life expectancy as 72 years which is entirely consistent with the lower-than-average number of Gypsies and Travellers aged over 70 years in the 2011 Census (and also in ORS's own survey data).

Modelling Outputs

^{13.} If we assume a TFR of 3 and an average life expectancy of 72 years for Gypsies and Travellers, then the modelling, undertaken in PopGroup, projects the population to increase by 66% over the next 40 years – implying a population compound growth rate of 1.25% per annum. If we assume that Gypsy and Traveller life expectancy increases to 77 years by 2050, then the projected population growth rate rises to nearly 1.50% per annum. To generate an 'upper range' rate of population growth, we assumed an implausible TFR of 4 and an average life expectancy rising to 77 over the next 40 years – which then yields an 'upper range' growth rate of 1.90% per annum.

Household Growth

- ^{14.} In addition to population growth influencing the number of households, the size of households also affects the number. Hence, population and household growth rates do not necessarily match directly, mainly due to the current tendency for people to live in smaller childless or single person households.
- ^{15.} Because the Gypsy and Traveller population is relatively young and has many single parent households, a 1.25%-1.50% annual population growth could yield higher-than-average household growth rates, particularly if average household sizes fall or if younger-than-average households form. However, while there is evidence that Gypsy and Traveller households already form at an earlier age than in the general population, the scope for a more rapid rate of growth, through even earlier household formation, is limited.
- ^{16.} Based on the 2011 Census, the table below compares the age of household representatives in English households with those in Gypsy and Traveller households showing that the latter has many more household representatives aged under-25 years. In the general English population 3.60% of household representatives are aged 16-24, compared with 8.70% in the Gypsy and Traveller population. ORS's survey data shows that about 10% of Gypsy and Traveller households have household representatives aged under-25 years.

Age of household representative	All househol	ds in England	Gypsy and Traveller households in England		
Age of household representative -	Number of households	Percentage of households	Number of households	Percentage households	
Age 24 and under	790,974	3.6%	1,698	8.7%	
Age 25 to 34	3,158,258	14.3%	4,232	21.7%	
Age 35 to 49	6,563,651	29.7%	6,899	35.5%	
Age 50 to 64	5,828,761	26.4%	4,310	22.2%	
Age 65 to 74	2,764,474	12.5%	1,473	7.6%	
Age 75 to 84	2,097,807	9.5%	682	3.5%	
Age 85 and over	859,443	3.9%	164	0.8%	
Total	22,063,368	100%	19,458	100%	

Table 2 - Age of Head of Household (Source: UK Census of Population 2011)

^{17.} The following table shows that the proportion of single person Gypsy and Traveller households is not dissimilar to the wider population of England; but there are more lone parents, fewer couples without children, and fewer households with non-dependent children amongst Gypsies and Travellers

 Table 3 - Household Type (Source: UK Census of Population 2011)

Household Tupo	All househol	ds in England	Gypsy and Traveller households in England		
Household Type –	Number of households	Percentage of households	Number of households	Percentage households	
Single person	6,666,493	30.3%	5,741	29.5%	
Couple with no children	5,681,847	25.7%	2345	12.1%	
Couple with dependent children	4,266,670	19.3%	3683	18.9%	
Couple with non-dependent children	1,342,841	6.1%	822	4.2%	
Lone parent: Dependent children	1,573,255	7.1%	3,949	20.3%	
Lone parent: All children non- dependent	766,569	3.5%	795	4.1%	
Other households	1,765,693	8.0%	2,123	10.9%	
Total	22,063,368	100%	19,458	100%	

^{18.} The key point, though, is that since 20% of Gypsy and Traveller households are lone parents with dependent children, and up to 30% are single persons, there is limited potential for further reductions in average household size to increase current household formation rates significantly – and there is no reason to think that earlier household formations or increasing divorce rates will in the medium term affect household formation rates. While there are differences with the general population, a 1.25%-1.50% per annum Gypsy and Traveller population growth rate is likely to lead to a household growth rate of 1.25%-1.50% per annum

Summary Conclusions

- ^{19.} The best available evidence suggests that the net annual Gypsy and Traveller household growth rate is 1.50% per annum. Some local authorities might allow for a household growth rate of up to 2.50% per annum, to provide a 'margin' if their populations are relatively youthful; but in areas where on-site surveys indicate that there are fewer children in the Gypsy and Traveller population, lower estimates should be used.
- ^{20.} The outcomes of this Technical Note can be used to provide an estimate of local new household formation rates by adjusting the upper national growth rate of 1.50% based on local demographic characteristics.
- ^{21.} In addition, in certain circumstances where the numbers of households and children are higher or lower than national data has identified, or the population age structure is skewed by certain age groups, it may not be appropriate to apply a percentage rate for new household formation. In these cases, a judgement should be made on likely new household formation based on the age and gender of the children identified in local household interviews. This should be based on the assumption that 50% of households likely to form will stay in any given area and that 50% will pair up and move to another area, while still considering the impact of dissolution. This is based on evidence from over 140 GTAAs that ORS have completed across England and Wales involving over 4,300 household interviews.
