

Appendix1:
South Staffordshire Historic Environment Site Assessment 2020

Site Reference	Site Name	Direct RAG Score	Indirect RAG Score	Summary
SAD Site 141	154a Walsall Road	Green	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
SAD Site 228	Adult Training Centre off Histons Hill	Green	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
SAD Site 168	Brinsford Bridge	Amber	Green	No designated assets are located on the Site although the Grade II* Listed Moseley Old Hall (List No. 1039208) stands c.610m to the south on the opposite side of the motorway, whilst nearest designated asset a group of Grade II Listed converted farm buildings stand 520m to the north. The Site occupies part of the former ROF Featherstone site, and the Staffordshire HER records further non-designated assets within 500m. Care will need to be taken to protect the settings of designated assets, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
SAD Site 379	Land east of Ivetsey Road	Green	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
SAD Site 313	Land off Himley Lane	Green	Amber	The land to the north was assessed previously in 2017 and 2019 (Site 313). Should this site be allocated care will need to be taken to protect the settings of the Grade II Listed former farm buildings that stand c.50m to the west, although it is likely that intervening buildings will at least in part limit any effect. Mitigation will also be required to address the potential for effects on any archaeological remains that may be present.
SAD Site 119	Land off Saredon Road	Green	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
SAD Site 136	Landywood	Amber	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
SAD Site 139	Pool View, Churchbridge	Green	Green	Site previously assessed by the 2017 Site Allocations Document Historic Environment Site Assessment (HESA 1)
527	Land North of New Road	Green	Green	No designated assets are located on the Site although a group of Grade II Listed former farm buildings stand c.150m to the west. Although no non designated assets are recorded on the Site by the Staffordshire HER, a range of non-designated assets are recorded within the vicinity whilst historic map evidence suggest that limited mineral extraction (quarrying or similar) may have taken place on the Site. Care will need to be taken to protect the settings of designated assets including the Listed former farm buildings to the west, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
654	Lawnswood Site B	Amber	Red	This site was previously assessed in 2019 (Site 654) and allocated a Red RAG score.
655	Lawnswood Part C	Green	Green	This site was previously assessed in 2019 (Site 655) and allocated a Green RAG score
659	land nr Shoal Hill Tavern	Green	Green	No designated assets are located within 500m of the Site and it is likely that any intervisibility will be blocked by the intervening townscape. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

085	Land at Grange Farm	Green	Amber	The Grade II Listed Grange Farmhouse (List No. 1344649) which dates to the late 16th century and is timber framed stands immediately south of the the site, although it is possible that the majority of the development area may be shielded from view by the intervening farmyard. Never the less care will need to be taken so as to ensure that sufficient open land is retain around the farm so as to enable its rural context as a moderate to high status agricultural dwelling to be retained, and it might therefore not be possible to develop the entirety of this site. Mitigation will also be re required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
082	Land between A449 Stafford Road and School Lane	Green	Green	No designated assets are located within 500m of the Site although the Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
087	Stadacona	Green	Green	No designated assets are located within 400m of the Site although the Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
116	South west Cheslyn Hay, south Wolverhampton Road	Amber	Green	No designated assets are recorded within 600m of the site although the Staffordshire HER records the non-designated site of the former Great Wyrley Colliery in the northeastern part of the Site. Modern aerial photographic mapping suggests that the remainder of the Site has been severely impacted by mineral extraction which suggests that any archaeological remains that may have been present are likely to have ben destroyed. The colliery site by contrast appears to be intact and it is therefore recommended that an archaeological survey be undertaken should that portion of the Site be selected for development. The predicted Amber score relates to the colliery site only, on its own the quarry area which forms the majority of the site would score Green for direct impacts.
120	Littlewood, Cheslyn Hay	Green	Green	No designated asets are located within 650m of the site although the Staffordshire HER records the non-designated former route of a mineral railway crossing the northwest corner of the Site. Should the site be allocated, mitigation will be required in order to asses the potential for impacts upon any archaeological remains that may be present on the Site.
131	Land at Blacklees Farm, Warstone Road	Amber	Amber	No designated assets are located within 900m of the site, although the Staffordshire HER records a non-designated farmstead in the extreme southwest corner of the Site and it is recommended that an assessment be undertaken in order to determine whether any historic farm buildings remain. Should any non-designated historic structures be identified on the site then consideration will need to be given to the potential effects of development on their setting. It is recommended that a programme of mitigation be undertaken in order to address any archaeological remains that could potentially be present on the Site.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

202	Land East of Wolverhampton Road	Green	Green	No designated assets are recorded on the Site, the nearest Grade II Listed Longford Lodge (List No. 1374115) lying c.615 m to the north. The Staffordshire HER records a range of non-designated assets within 500m including the course of a former turnpike road along the Site's western boundary (now the A4601) whilst the Watling Street Roman Road c.305 m to the north. Although no assets are recorded on the Site itself archaeological mitigation will be required to address any previously unrecorded remains that may be present.
489	Claypit, Quarry	Amber	Green	Northern part of the Site assessed in 2019. The nearest designated asset, the Grade II Listed Cheslyn Hay War Memorial lies 415m to the southeast of the Site, whilst the Staffordshire HER records the site of the Rosemary Tileries, a late 19th century tileworks on the Site and modern aerial photographic mapping suggests that the ground has been extensively disturbed through quarrying. It is therefore recommended that an historic environment desk-based assessment be prepared in order to determine whether further mitigation will be required.
150	Land off High Hill Road, Essington	Green	Green	No designated assets are located within 850m of the Site and no non-designated assets are recorded either on the Site in proximity to it. Given this the potential for heritage constraints is considered to be low, although given that there remains a risk of previously unrecirded buried remains being disturbed a programme of archaeological mitigation is recommended.
151 / 662	Land between M6 & Essington and adjacent Bursnips Rd	Amber	Green	No designated assets are located within 750m of the Site. The Staffordshire HER records a former colliery in the northern part of the Site and on the land to the immediate south of the Site. There is consequently an elevated potential for medieval or post-medieval remains to survive in the southern part of the Site and for at least some colliery evidence to survive in its northern part. Mitigation will therefore be required to address potential effects on any remains which may be present on the Site.
154	South side High Hill, Essington	Green	Green	No designated assets are located within 650m of the Site and no non-designated assets are recorded on it by the Staffordshire HER. Mitigation is however recommended to address potential effects on any remains which may be present on the Site.
471	Land at Bognop Road, Essington	Green	Amber	No designated assets are located on the Site although the Grade II Listed Essington Hall Farmhouse lies within 200m to the west whilst the Scheduled remains of the Moat House moated site survive within woodland 320m to the south. Care will need to be taken with the design of any new development to ensure that their settings are protected. No non-non designated assets are recorded either on the Site or within its vicinity by the Staffordshire HER, however mitigation is recommended in order to address any previously unrecorded archaeological remains that may be present.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

169	Featherstone Hall Farm, New Road	Amber	Amber	No designated assets are located on the Site although a group of Grade II Listed converted farm buildings stands c.75m to the northwest on the opposite side of New Road. The site is currently occupied by a non-designated historic farm complex that is recorded on the Staffordshire HER and care will need to be taken to ensure that any historic structures which may survive on the Site, including the surviving boundary wall on Featherstone Lane are retained if at all possible. If retention does not prove possible then a programme of historic building recording may be required. Care will need to be taken to protect the settings of designated assets including the Listed former farm buildings to the northwest, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
170	Land east of Brookhouse Lane	Green	Amber	The Grade II* Listed Moseley Old Hall stands c.145m to the south of the Site. Although the intervening presence of the M54 motorway and its associated tree belt will limit the potential for an effect upon the setting of this National Trust property, care will need to be taken with the design of any development to ensure that its setting, as well as those of other related designated assets are protected. The Staffordshire HER records a Roman coin as having been recovered from the Site as well as a range of non-designated assets within the vicinity, given this and its proximity to Moseley Old Hall to the south a programme of mitigation is recommended to address any previously unrecorded remains that may be present.
172	Land at Cannock Road	Amber	Red	The Site was formerly located within the parkland associated with Hilton Hall, which was reportedly laid out by Humphrey Repton, although it is now bisected by motorways. Nineteenth century Ordnance Survey mapping indicates that the Site was historically located outwith the core designed landscape, but within one of the enclosing tree belts. Grade I Listed Hilton Hall and its Grade I Listed Conservatory stand c. 485m and c.365m to the east respectively within the surviving parkland, and it is possible that tree cover may at least partially shield development within this Site from view from these nationally important designated assets. However, considerable assessment, study and visualisation would be required in order to determine whether this site is suitable for development. Any development on this site would need to safeguard the setting of Hilton Hall and its associated assets. Should the site be allocated, mitigation will be required in order to assess the potential for impacts upon any previously unrecorded buried archaeological remains that may be present on the Site.
396	Land off New Road/East Road	Green	Amber	No designated assets are located on the Site although a group of Grade II Listed converted farm buildings stands c.30m to the north on the opposite side of New Road. No non-designated assets are recorded on the Site although the Staffordshire HER records a range of assets within 500m. Care will need to be taken to protect the settings of designated assets including the Listed former farm buildings to the north, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
203	Land west of Woodhaven, Wedges Mills	Green	Green	No non-designated assets have been recorded on the Site and no designated assets are located within 500m of its boundary. Given this the potential for heritage constraints is considered to be Low, although given that the possibility of previously unrecorded assets being present cannot be discounted a programme of mitigation is recommended.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

137	South of Upper Landywood Lane	Amber	Green	No designated assets are located within 400m of the Site, although the Staffordshire HER, records the course of a 19th century tramway bisecting the Site from north to south the Site of a colliery lies immediately east of the Site. The route of the Wyrley Bank Branch of the Wyrley and Essington Canal extends along the Site's southern boundary. Modern aerial photographic mapping suggests that extent remains of the tramway survive on the Site along with is apparent terminus beside the canal. Given this it is recommended that an archaeological survey of the tramway be undertaken, and that its alignment be retained as public open space within any development. Any physical remains associated with the tramway should be preserved if at all possible. Mitigation will also be required to address potential effects on any previously unrecorded buried remains that may be present.
136a	Land at Upper Landywood Lane (same as 13, 14, 16)	Amber	Green	No designated assets are located on the site and whilst care will need to be taken to protect the setting of the Grade II Listed Landywood Farmhouse c.175m to the east and effect on its setting is unlikely given the intervening presence of previous development. The Staffordshire HER records the former presence of several historic collieries on this Site and mitigation will be required to address any post-medieval or earlier remains that may be present.
138	Lea Croft Lane/Roman View	Amber	Green	No designated assets are located within c.980m and although the Staffordshire HER records a 19th century coal shaft on the Site, its former position is now beneath a lake, which presumably was created through quarrying. However, the A5 to the immediate north of the Site respects the alignment of the Watling Street Roman road and it is therefore recommended that a programme of mitigation be required.
440	Land east of Love Lane	Green	Green	No designated assets are located within 1km of the site, and no non-designated assets are recorded either within the Site or within the vicinity. Given this the potential for heritage constraints is considered to be low, although given that the presence of previously unrecorded buried remains cannot be discounted a programme of mitigation is recommended.
010	Land at Lower Drayton Farm	Amber	Green	No designated assets are recorded on the Site although three Grade II Listed Buildings lie within 500m, the nearest Lower Drayton Cottages (List No. 1180268) standing 260m to the north whilst the Canal Conservation Area lies 215m to the southeast. The Staffordshire HER records that the former Stone, Stafford and Penkridge Turnpike Road extends along the western boundary, whilst a range of metal artefacts have reportedly been found on the Site by metal detectorists. Care will need to be taken to ensure that the settings and characters of designated assets within 500m are protected and maintained. Archaeological mitigation will also be required to ensure that any unrecorded remains which may be present on the Site are addressed.
010	Land at Lower Drayton Farm	Amber	Green	No designated assets are recorded on the Site and none lie within 500m. The Staffordshire HER records that the former Stone, Stafford and Penkridge Turnpike Road extends along the eastern boundary, whilst a range of metal artefacts have reportedly been found in an adjacent field by metal detectorists. The HER records the site of a cross on the eastern part of the Site. Care will need to be taken to ensure that the settings and characters of designated assets within 500m are protected and maintained. Archaeological mitigation will also be required to ensure that any unrecorded remains which may be present on the Site are addressed.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

238	Land at former Perton Court Farm	Green	Amber	This Site was previously assessed in 2019 (Site 238) and allocated an Amber RAG score
407	Land west of Wrottesley Park Road (north)	Amber	Green	No designated assets are recorded within 1km, although a non-designated building which appears to be a survival from RAF Perton was recorded on the Site in 2017. The Staffordshire HER records a series of cropmarks that appear to relate to medieval field systems on the Site, whilst further non designated remains are recorded within the vicinity. Mitigation will be required in order to adress potential effects on any previously unrecorded archaeological remains that may be present.
184	Land east Manor Drive	Amber	Green	No designated assets are located on the Site, although two Listed Buildings; Woodberry House (Grade II) and the Parish Church of St Mary and St Luke stand c.265m and c.280m to the southwest within the core of the village. No non-designated assets are recorded on the Site by the Staffordshire HER although a range of medieval and post-medieval remains and artefacts recorded within the vicinity along with a probable Bronze Age burnt mound. Care will need to be taken to protect the settings of designated assets, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
183	Land off Swan Lane	Green	Green	No designated assets are located on the Site, although four Listed Buildings including the barn at Home Farmhouse and the Parish Church of St Mary and St Luke stand to the north within the core of the village. The barn being the nearest designated asset c.215m to the north of the Site boundary. No non-designated assets are recorded on the Site by the Staffordshire HER although ridge and furrow was recorded within the adjacent field during the 1960's. Care will need to be taken to protect the settings of designated assets, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
181	Land at the rear of Tangle Wood, Elms Lane	Green	Green	No designated assets are located on the Site, although two Listed Buildings; Woodberry House (Grade II) and the Parish Church of St Mary and St Luke stand c.275m and c.330m to the north within the core of the village. No non-designated assets are recorded on the Site by the Staffordshire HER although ridge and furrow was recorded within the adjacent field during the 1960's. Care will need to be taken to protect the settings of designated assets, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.
185	Land off Manor Drive (south)	Amber	Green	No designated assets are located on the Site, although two Listed Buildings; Woodberry House (Grade II) and the Parish Church of St Mary and St Luke stand c.275m and c.205m to the west within the core of the village. No non-designated assets are recorded on the Site by the Staffordshire HER although an extensive moated site is recorded to the immediate south, with further medieval and post-medieval remains and artefacts recorded within the vicinity along with a probable Bronze Age burnt mound. Care will need to be taken to protect the settings of designated assets, whilst mitigation will be required to address the potential for impacts upon any archaeological remains that may be present.

Appendix1:
South Staffordshire Historic Environment Site Assessment 2020

313	Land off Himley Lane (Site 1)	Amber	Amber	Part of the western edge of this Site was assessed previously in both 2017 and 2019 (Site 219). This new proposal (2020) is for a considerably larger area that extends as far eastwards as the projected alignment of the Greensforge to Pennocrucium Roman Road and mitigation will therefore be required to address the potential for effects on any previously unrecorded remains that could be present. A cluster of Grade II Listed former agricultural buildings stand c.50m to the west of the Site and care will need to be taken to protect their settings. However, given the presence of intervening buildings any effect on their setting would in all probability be limited.
314	Land off Wombourne Road (Site 2)	Green	Green	The southern part of the Site was assessed in 2019 (Site 314). The extended Site (2020) directly borders the Canal Conservation Area along its western boundary and care will need to be taken to protect both the setting and the character of this designated asset. Mitigation will be required in order to address the the potential for effects on any previously unrecorded remains that may be present.
416a	Land off Orton Lane (rear Strathmore Crescent)	Green	Green	This Site was previously assessed in 2019 and allocated a green RAG score (Site 416a)
102	Land at Garrick Works, Garrick Farm, Stafford Road	Green	Green	No designated assets are located on the Site, the nearest being a Grade II Listed canal bridge over 1km to the north. The Staffordshire HER records a range of non-designated assets within 500m of the Site although none are recorded on the Site itself. Care will need to be taken to ensure that the settings of designated assets are protected and mitigation will be required to address the potential for any archaeological remains to be present.
474	Land at Longford Park	Amber	Amber	A Grade II Listed gate lodge stands on the southern boundary of the Site and its setting will need to be protected within any development. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site including the course of the Watling Street Roman road which is respected by the modern A5 to the immediate south. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
494b	Land at Springhill Lane parcel B	Green	Amber	No designated assets are recorded on the Site although the boundaries of the Vicarage Road Conservation Area extend to within c.620 m from the east whilst the Lower Penn Conservation Area lies c.645 m to the west. Although no non-designated assets are recorded on the Site itself the Staffordshire and Wolverhampton HER's record a range of non-designated assets within 500m including the project course of a north-northeast south-southwest aligned Roman Road c.475 m to the east. Care will need to be taken to protect the settings of designated assets mitigation will be required to potential effects on any previously unrecorded archaeological remains which may be present on the Site.
549	Land North of Dunsley Road Kinver	Amber	Amber	This Site formed part of a larger Site assessed in 2019 and allocated an Amber RAG score (Site 549). Care will be needed to protect the settings of both the Canal Conservation Area and the Grade II Listed Dunsley

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

615	Land West of School Lane	Green	Green	The southern portion of this field was previously assessed by the 2017 SAD HESA and current aerial photographic mapping indicates archaeological trial trenches both within the 2017 site and extending northwards into this new proposal (2020). It is recommended that the Council confirm the results of this work with the Staffordshire County Archaeologist. The nearest designated asset, a Grade II Listed bridge lies c.85m to the west of the Site whilst the Grade II* Registered Park and Gardens of Chillington Hall extend to within c.450m of the site boundary. Care will need to be taken to ensure that the settings of these assets is protected, whilst further mitigation may be required in order to address the potential for effects upon any archaeological remains that may be present on the Site.
525	Land North of Jones Lane Part 1	Amber	Green	No designated assets are located within 1km of the Site although the Staffordshire HER records the non-designated site of a late 19th century colliery extending onto its eastern boundary. Given the former presence of the colliery, as well as the potential for earlier previously unrecorded buried remains to be present on the Site itself it is recommended that a programme of archaeological work be required.
526	Land South of Jones Lane Part 2	Green	Green	No designated assets are located within 1km of the Site and no non-designated assets are recorded either on the Site itself, although the Staffordshire HER records the non-designated site of a late 19th century colliery to its immediate east. Given its proximity to the colliery site as well as the potential for previously unrecorded earlier buried remains to be present it is recommended that a programme of archaeological mitigation be required.
529	Middle Hill Part 2	Amber	Green	No designated assets are recorded on the Site, the nearest Grade II Listed Saredon Hall (List No. 1039178) c.900 m the west. The Staffordshire HER records the remains of a Second World War anti-aircraft battery extending across the southern part of the site. Aerial photographic mapping suggests that these upstanding remains are quite extensive. Archaeological mitigation will be required to address any previously unrecorded remains that may be present. Care will need to be taken to protect the settings of designated heritage assets and the non-designated remains of the anti-aircraft battery should be protected within the development if at all possible. If retaining the battery does not prove possible then a detailed programme of archaeological investigation and recording would need to precede their removal. Mitigation will also be required to address any previously unrecorded remains that may be present.
536	Land off Holly Lane Part 1	Green	Amber	No designated assets are located on the Site although the Grade II Listed Landywood Farmhouse stands c.180m to the west. Although care will need to be taken to protect the setting of this Listed Building given the intervening presence of the railway line any effects could potentially be addressed using mitigatory measures such as landscapes. No non-designated assets are recorded on the site by the Staffordshire HER although mitigation will be required to address any potential effects on any previously unrecorded archaeological remains that may be present.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

536	Land off Holly Lane Part 3	Green	Red	Although no designated assets are located on the Site, the Grade II Listed Landywood farmhouse which has an early 16th century core, stands within 15m of the Site boundary which surrounds the Site on three sides. The Site almost certainly formed part of the farm's core landholding and its development would therefore severely impact upon the observer's ability to interpret the Listed Building's authentic rural complex. Consequently any development would need to be carefully located so as to avoid encircling the farm. Detailed assessment will be required in order to identify and protect key views both of and from the farmhouse, although it should be recognised from the outset that it is unlikely that development could be delivered within the northeastern part of this Site. No non-designated assets are recorded on the Site by the Staffordshire HER, although mitigation will be required in order to address any previously unrecorded remains that could be present.
618	Land West A449	Green	Green	No designated assets are located within 250m of the Site and it is likely that any intervisibility will be blocked by the intervening townscape. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
624	Land adj Chase Gate PH	Green	Green	No designated assets are recorded within 500m of the Site and no non-designated assets are recorded on the Site itself although the A4601 along its western boundary respects the line of an 18th century turnpike.
582	land off Langley Road	Green	Green	This Site was previously assessed in 2019 and allocated a Green RAG score (Site 582)
591	Land at Oaklands Farm Huntington	Green	Green	This Site was previously assessed in 2019 and allocated a Green RAG score (Site 591)
592	Land at Oaklands Farm Huntington	Amber	Green	This Site was previously assessed in 2019 and allocated an Amber RAG score (Site 592)
638	Loades PLc	Green	Green	No designated assets are recorded within 350m of the Site although the Staffordshire HER records a range of non-designated assets within the vicinity. Consideration will need to be given to the potential for previously unrecorded buried remains to be effected by development on the Site.
134	Land at Jacobs Hall Lane	Amber	Amber	No designated assets are located within 1.5km of the Site, although the Staffordshire HER records a non-designated farmstead within the site boundary. Aerial photographic mapping suggests that the farmyard remains and care will therefore need to be taken to protect the setting and character of any historic farm buildings and structures that may survive. Given this a programme of historic building may be required, whilst it is recommended that archaeological mitigation be considered in order to address the potential for previously unrecorded archaeological remains to be present.
119b	Land of Saredon Road Part B	Green	Green	No designated assets are located within 500m of the Site and no non-designated assets are recorded either on the Site or within its vicinity. Given this the potential for heritage constraints is considered to be low, although given that the potential for previously unrecorded archaeological remains cannot be discounted a programme of mitigation is recommended.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

350d	Land West of Radford Lane Lower Penn	Amber	Amber	Northern part of the Site assessed in 2019 (Site 350d), Development within the southern part of the Site (Proposed in 2020) would be less sensitive due to the greater distance of separation between it and the Grade II Listed farmhouse and the Canal Conservation Area to the north. The potential effects of development within the northern part of the site would be as predicted in 2019 and consequently the overall RAG scoring remains unchanged. Mitigation would be required to address the potential for effects upon any previously unrecorded remains that may be present on the Site.
253		Green	Amber	This Site was previously assessed in 2019 and allocated an Amber RAG score (Site 253)
696	Land east of A34	Green	Green	No designated assets are located within 1km of the Site boundary, whilst the Staffordshire HER records a copper alloy ring as having been found on the Site, this may simply be a stray loss. Given the potential for previously unrecorded remains to be present it is recommended that a programme of archaeological mitigation be undertaken.
084a	Land at Birchcroft	Green	Green	No designated assets are located within 190m of the Site and it is likely that any intervisibility will be blocked by the intervening townscape. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
701	Land at Longdon	Green	Amber	No designated assets are located within 190m of the Site and it is likely that any intervisibility will be blocked by the intervening townscape. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site including a turnpike road along the eastern site boundary (the A449). Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.
702	Land off Fox Road	Green	Green	No designated assets are recorded within 300m of this Site although the Staffordshire HER records a range of non-designated assets within the vicinity. Mitigation will be required to address the potential for effects on any previously unrecorded remains that may be present.
703	Land north of Gunstone Lane	Amber	Amber	The Site lies immediately north of the Codsall Conservation Area and seven Listed Buildings stand within 500m including the Grade II* Listed Church of St Nicholas (List No. 1374035) c.100m to the west. Care will need to be taken to protect the settings of these Listed Buildings although it is possible that visibility will be blocked by the surrounding townscape. Care will also need to be taken to ensure that the character of the adjacent Conservation Area is maintained and this will need to consider both visibility and the potential for increased traffic levels along the narrow axis of Sandy and Gunstone Lanes as both these issues could potentially lead to an adverse effect on the character of the Conservation Area. Mitigation will be required to address the potential effects on any previously unrecorded archaeological remains that may be present.
704	Norton Lane	Amber	Green	No Designated assets are located within 1km of the Site whilst no non-designated assets are recorded within the site boundary. However, it should be noted that the A5 to the immediate north of the Site respects the alignment of the Watling Street Roman road and that there is therefore a potential for previously unrecorded remains to be present. It is therefore recommended that a programme of mitigation be required.

Appendix 1:
South Staffordshire Historic Environment Site Assessment 2020

705	Perton Golf Course	Amber	Green	The Site is currently occupied by a modern golf course. No designated assets are located within 400m of the Site and it is possible that any intervisibility will be blocked by intervening vegetation and buildings. The Staffordshire HER records a range of non-designated assets within the vicinity of the Site. Mitigation will be required to address the potential for effects on any previously unrecorded archaeological remains that may be present.f
494a	Land at Springhill parcel A	Green	Amber	This Site was previously assessed in 2019 (Site 494) and allocated an Amber RAG score
315	Land off Himley Lane (Site 3)	Amber	Amber	The western edge of this Site was previously assessed in 2019 (Site 315) however, this expanded proposal extends the Site considerably to the east to take in the projected line of the Greensforge to Pennocrucium Roman road. Mitigation will therefore be required to address the potential for effects on any archaeological remains that may be present. A group of Grade II Listed former farm buildings stand c.100m to the west of the Site and care will need to be taken to protect their settings, However, it is likely that any effect will be limited by the presence of intervening buildings.
029a	School Lane	Amber	Amber	No designated assets are located on the Site although two Grade II Listed Buildings; Dunston Hall (List No.1039216) and the Church of St Leonard, Dunston (List No. 1039215) stand 175 and 135 metres to the east. Two further Grade II Listed Buildings lie within 500m. The Staffordshire HER records the non-designated landscape park of Dunston Hall to the south of the site, an oval enclosure, whilst reclinear enclosures and linear features have identified on the site as cropmarks. The HER places the the location of a Domesday settlement on the Site itself although at present this is based on documentary evidence. Care will need to be taken in order to ensure that the settings of the nearby Grade II Listed Buildings are protected and that the character of the non-designated landscaped park to the south is maintained. Given the potential presence of a medieval settlement on the Site a detailed mitigation strategy will be required.
