

Core Policy 1 – The Spatial Strategy for South Staffordshire

The rural regeneration of South Staffordshire will be delivered through the implementation of the following Spatial Strategy. The principal aim will be to meet local needs, whilst recognising the constraints that impact upon the District, and support and improve infrastructure and service delivery in the District.

Throughout the District, growth will be located at the most accessible and sustainable locations in accordance with the Settlement Hierarchy set out below and the Council will work with partners to deliver the infrastructure, facilities and services required to support this growth. An integral part of the Strategy will be to protect, maintain and enhance the natural and historic environment and the local distinctiveness of the District and retain and reinforce the current settlement pattern.

In relation to the District's existing communities and settlements, appropriate proposals which contribute to their improved sustainability, cohesion and community wellbeing, will be supported.

Development proposals will be expected to make efficient use of land and prioritise the use of Previously Developed Land (brownfield land) in sustainable locations, provided it is not of high environmental value, whilst safeguarding the character of existing residential areas.

Main Service Villages

Bilbrook, Brewood, Cheslyn Hay, Codsall, Great Wyrley, Kinver, Penkridge, Perton and Wombourne are defined as **Main Service Villages** and will be the main focus for housing growth, employment development and service provision. Village centres will be the focus for new shopping and small scale office development to maintain their vitality and viability.

Local Service Villages

Coven, Essington, Featherstone, Huntington, Pattingham, Swindon and Wheaton Aston are defined as **Local Service Villages** where limited development will be supported where it meets local needs, whilst recognising the constraints that impact upon the District. Employment development will be limited to that which meets local business and community needs and maintains the vitality and viability of these communities. Shopping and office development will be located in the village centres.

Small Service Villages

Bednall, Bobbington, Bishops Wood, Dunston, Shareshill, and Trysull are defined as **Small Service Villages** where very limited development may be acceptable for the provision of rural affordable housing where it clearly supports a local need and contributes to the sustainability of those local communities. Employment development will be limited to rural employment and diversification which meets local business and community needs.

Other Villages and Hamlets

The villages defined as **Other Villages and Hamlets** are not identified for growth, and development will only be permitted in exceptional circumstances for the provision of rural affordable housing to meet identified local needs. New development in these locations will therefore be limited to rural affordable housing schemes provided through rural exception sites and the conversion and re-use of redundant rural buildings to appropriate uses.

Outside the Service Villages

Outside the service villages, the objective of the Spatial Strategy is to protect the attractive rural character of the countryside where new development will be restricted to particular types of development to meet affordable housing needs, support tourism, provide for sport and recreation and support the local rural economy and rural diversification.

As part of the strategy for employment and economic development, support will continue to be given to the four existing freestanding strategic employment sites (i54, Hilton Cross, ROF Featherstone/Brinsford and Four Ashes).

The Green Belt and Open Countryside

The South Staffordshire portion of the West Midlands Green Belt as defined on the Policies Map, will be protected from inappropriate development and proposals will be considered in the light of other local planning policies and the policy restrictions relating to Green Belt in the NPPF, however the Council will consider favourably sustainable development which accords with this Spatial Strategy.

The general extent of the Green Belt and the area defined as Open Countryside will be protected and maintained for the Plan period but some land will need to be released from the Green Belt and Open Countryside in some locations at the Main and Local Service Villages to deliver the proposed development strategy and enable the sustainable growth of these villages. A partial review of Green Belt boundaries and a review of Major Developed Sites in the Green Belt will be carried out through the Site Allocations DPD.

Delivering the Strategy

The Spatial Strategy will be delivered through the Core Policies and Development Policies. In all cases development should not conflict with the local planning policies, particularly the environmental policies. Development should be designed to be sustainable, seek to enhance the environment, and should provide any necessary mitigating or compensatory measures to address harmful implications.

Explanation

- 6.4 South Staffordshire lies on the edge of the West Midlands Conurbation close to the Major Urban Areas of the Black Country and has its own distinctive character. A key aspect of South Staffordshire's local distinctiveness is based around its ethos and philosophy of being a 'community of communities'. The settlement pattern of South Staffordshire is that of a rural area with many villages of different sizes situated within 27 parishes. There is no single dominant settlement and many of our residents rely on the services provided within towns and cities outside the District to meet some of their 'higher order' needs including hospitals, certain types of retail needs, and certain types of leisure and employment opportunities. This is in part because they are not able to meet their needs locally. Similarly, many of the people who work in and use the facilities of the District, actually live outside it.
- 6.5 The Spatial Strategy for South Staffordshire is to spread development geographically around the District based on a Settlement Hierarchy. The principal aim of the Strategy is to meet local needs whilst recognising the constraints that impact upon the District, and support the retention of existing facilities and services in villages in a sustainable way and where possible improve them. The Settlement Hierarchy classifies villages as Main Service Villages, Local Service Villages and Small Service Villages and the very small villages in the District are classified as Other Villages and Hamlets. The Settlement Hierarchy is shown on the following map.

Policy GB1: Development in the Green Belt

Within the South Staffordshire portion of the West Midlands Green Belt as defined on the Policies Map, development acceptable within the terms of national planning policy set out in the NPPF will normally be permitted where the proposed development is for either:

A. A new or extended building, provided it is for:

- a) purposes directly related to agriculture or forestry; or
- b) appropriate small-scale facilities for outdoor sport or recreation, nature conservation, cemeteries and for other uses of land which preserve the openness of the Green Belt and which do not conflict with its purposes; or
- c) affordable housing where there is a proven local need in accordance with Policy H2; or
- d) limited infilling* and limited extension(s), alteration or replacement of an existing building where the extension(s) or alterations are not disproportionate to the size of the original building, and in the case of a replacement building the new building is not materially larger than the building it replaces. Guidance in these matters will be contained in the Green Belt and Open Countryside Supplementary Planning Document (SPD).

B. The re-use of a building provided that:

- e) the proposed use of any building (taking into account the size of any extensions, rebuilding or required alterations), would not harm the openness of the Green Belt or the fulfilment of its purposes.

C. Changes of Use of Land:

- f) the carrying out of engineering or other operations, or the making of a material change of use of land, where the works or use proposed would have no material effect on the openness of the Green Belt, or the fulfilment of its purposes.

D. Development brought forward under a Community Right to Build Order.

Development proposals should be consistent with other local planning policies.

**Footnote: Limited infilling is defined as the filling of small gaps (1 or 2 buildings) within a built up frontage of development which would not exceed the height of the existing buildings, not lead to a major increase in the developed proportion of the site, or have a greater impact on the openness of the Green Belt and the purpose of including land within it.*
